Japanese Ball Team To Play Here In Dominion Day Celebration

Obstacle races—with original obstacles—tug-of-war contests between teams from Abbotsford, Clayburn, Kilgord, Sumas and Matsqui, races of all kinds, and baseball games, one between the Abbotsford seniors and a fast Japanese nine from Vancouver, are among the attractive Dominion Day program to be held in Abbotsford. Proceedings open with a baseball game between boys' teams at 9.30 a.m., and lively events will continue throughout the entire day, closing with the senior ball game, starting at 4 p.m. Prizes will be \$25 equipment for winning senior team and \$10 for winning junior team.

At night a big dance takes place in Jubilee hall. Further program details are to be taken up at a meeting of the committee, to be held in the Orange hall tonight.

Invited To Sell Cherries In Chilliwack

Cherry-growers of this district are invited to take advantage of the Chilliwack cherry carnival next week to market their fruit, a price being established of 8c for Royal Ann's and 12c a pound for Byng's and Lamberts, in good condition. Reports from Chilliwack indicate that the annual carnival in that city will be an outstanding success this year, and orders have already been received by mail for almost 50 crates of the cherries.

The invitation comes through the local Board of Trade, and is extended to every cherry-grower.

Abbotsford School Promotions

Div. 5, from 3B to 3A—(in order of merit)—Thomas Bennett, Lorne Vanetta, Stanley Lonsdale, Helen Taylor, Jack Murphy, Evelyn Hay, Emily La Pinsky, Mildred Barber, James McDonald, Victor Heller, Maggie Sinclair, Jeumie DesMazes, Kenneth Richler, Marjorie Harrop.

From 2A to 2B—Archie Paton, Ralph Godson, Augustine McDonald, Olive Bedlow, George Grant, Wesley White, Peter Slater, Billy Hayne, Dolly Springay, Stuart Baines, Gwen Crockett, Geo Atrill, Jimmy McPhee, Lyall Switzer, Fred Wahlman.

From 2B to 2A—Dorothy Johnson, Kittie Onadera, Louis Richler, Joe Leary, Frank Crockett, Douglas Thorne, Douglas Downie, Douglas Reith, Effie Roberts, Lionel Greenwood (latter pupil is in hospital, but promoted on his year's record).

Honor roll: proficiency—Lorne Vanetta; deportment, Helen Taylor; regularity and punctuality, George Grant, V. Hunt, teacher.

From 6A to 7—Edith Barker, Peggy Stobbs, Phyllis LaPinsky, Betty Swift, Orma Bryenton, Donald McNeill, James Chapman, Victor Boyce, Fergie Webster.

From 7 to 8—Mary Thorne, John Stobbs, Beryl White, Brian Hay, Lillian Coutts, Bernice Dunham, Andy DesMazes, Henry Currie, Hans Calvert, William Taylor, May Rooney, Connie Reith, Roberta Ralston, Wesley Cruithers, Eearl Farrant, Ellen Sykes, Olive McNelly, Athole Gray.

Workmen are busy digging a trench up Essendene avenue hill to provide water connection to Jubilee hall. The home of J. Arnold is also to be given service.

A reduction in electric light rates in the Valley is probable in the opinion of E. H. Barton, president of the Associated Boards of Trade, who is one of a delegation interviewing the power company in this matter.

Mount Lehman W.I. held its annual garden party at Mrs. Coughlan's last week, and an enjoyable and instructive program was rendered. More than 100 persons attended. Mrs. Coutts rendered several numbers.

Jim Stewart is being attended in the hospital for tonsillitis.

There are many beautiful monuments in and around Vancouver. In the top left picture is that erected to Queen Victoria by the school children of Greater Vancouver. In the top right is a little-known monument near Brockton point to the memory of the crew of the Chehalis, wrecked opposite this spot. In the center is that erected to David Oppenheimer, mayor of Vancouver, when Stanley Park was opened. Bottom left picture shows the monument erected by the Vancouver Kiwanis Club to "Old Black Joe" Fortes, famous life guard at English Bay. Bottom center is the Japanese monument to those of their race that served with the Canadian Army in the war. At the left of the picture above will be seen the stone cairn which commemorates the wreck of the S.S. Beaver, that gallant little steamer which was the first on the Pacific Ocean.

—(Plate courtesy B. C. E. Railway Co.)

DEALER: "Ere, Joel Ride this 'oss round for the gent."
NEW HAND: "Ow shall I ride it loss, for buying or selling?"

Talk Peace To Have Peace

It is now fairly well recognized by students of international relations that one of the causes of war is to be found in the constant predictions of war, in references to "the next war," and surmises as to the varying forms which hostilities will take when nations again take up arms against each other. Those who constantly predict war are, says a college president, "not simply reporters of probable events, they are actual causes of war, generally among the chief causes." That is, talk war and you have war.

Recognizing the correctness of this view, it is equally true that if the statesmen and leading men in all countries cultivate the habit of talking peace instead of war, the world will have peace. "The oftener world peace is discussed among serious minded men and women," says a United States paper, "the better the prospect that war can be at last conquered," and it adds that the more intelligent leaders of democracy the world over can be brought together to consider steps for peace. As they gather from time to time at Geneva the brighter becomes the prospect that ultimately—perhaps sooner than most of us now believe—war will be abolished.

War after all is largely a state of mind. Let the people of any community or country begin to take a pessimistic view of things and constantly harp upon business depression and hard times, and it is inevitable that depression and hard times will come. Equally true is it that when people talk prosperity and adopt an optimistic tone, a revival in business and industrial activity follows. If, instead of thinking of "the next war" and talking war, people think and talk peace, then peace rather than war will prevail.

It has been reported that the Supreme Court of the United States has settled one hundred disputes between States, and in Canada our Supreme Court and the Judicial Committee of the Privy Council, have settled numerous disputes between Provinces and between Provinces and Dominion. Why should not disputes between nations be settled in a like sensible way? There is quite as much justification for two States or two Provinces to declare war and fly at each other's throats as there is for two nations to take such insane action.

War is a stupid business. It settles no issues. It comes about when a little group of men get into a quarrel with another little group. The law does not allow individuals to murder each other because they have a quarrel, and international law should, in like manner, outlaw war as a means of settling disputes between nations. War between nations is evidence that the leaders in these countries have not sufficient intelligence or sufficient patience to find a way out, so they select the finest men on both sides and set them pounding each other into the mud and blood and blowing each other to bits. The side that can stand this the longer is the wiser and gets its own way. There is no reason employed in the settlement.

Sir Esme Howard, British Ambassador at Washington, in a recent address said: "If it can be proved to a man that if his country goes to war for any issue short of its absolute liberty of action at home, and in defence of that liberty, he will in future stand a very good chance of being bombed in his home; if we can show him that even though his country may be victorious, he will certainly have his taxes increased by 200, 300, 400 or 500 per cent.; if we can make it clear to him that for the sake of some issue to which he is probably an entire stranger he risks having to give up that new Ford next month, or, even worse, that he may very probably be thrown out of work, as has been the fate of millions in Europe after the last war; then perhaps he may find war less pleasingly dramatic and may bestir himself to see that as a means of settling disputes between nations, it is better abandoned. So far as statecraft is concerned, the fear of war is the beginning of wisdom."

Some people may be inclined to doubt the value of Peace Talks, Disarmament Conferences, and treaties between nations outlawing war, but the fact is these are all factors in educating people and helping to create and develop a peace consciousness in all countries. And, let it be repeated and emphasized, the creation of such a consciousness is the strongest of all guarantees for the maintenance of peace.

Due To Irrigation

There are now eight irrigation projects in Southern Alberta covering a total acreage of 400,446, of which 188,930 acres are irrigable. One of the projects, the Lethbridge Northern Irrigation District, reports having doubled its occupied area within the past two years, trebled its production and increased its population two and a half times.

Medical Aid Caravan

A medical aid caravan will circulate through Northern Alberta this year. It has been sent out by the provincial department of health and is in charge of Dr. R. T. Washburn, superintendent of the University of Alberta hospital.

The beam cast by the latest monster beacon is estimated at 500,000,000 candlepower.

Beautifying School Grounds

Because of the co-operation of the forestry farms at Indian Head, marked progress in beautifying school grounds with trees has been made this spring. A total of 165,000 trees have been bedded in 167 school grounds throughout Saskatchewan. These included 67,700 maples, and 60,850 caragana.

A man who had been asked to make his after-dinner speech as short as possible, arose and said:

"I am asked to propose the toast of Mr. Jobson, and I have been told that the less said about him the better!"

A British scientist predicts that, in time to come, men will be born toothless. We thought, in our ignorant way, that they usually were born that way.

Tribute To British Flag

Union Jack Made Union Flag Possible Says South African Councillor

A great tribute has just been paid to the Union Jack, and satisfactorily enough from that country in which there has been some commotion about it—South Africa. A press despatch from there says that native affection for this flag was eloquently demonstrated at a General Council of the Transkeian Territories which might be described as a native Parliament, when the Council unanimously passed a resolution that the Government be requested to permit the Union Jack to be flown with the Union of South Africa flag on all Magistrates' offices in the native territories. A Councillor asked the members not to discard their old friend the Union Jack, which had freed them from slavery and which was the only flag they knew. He did not object to the Union Flag, but pointed out that were it not for the Union Jack there would be no Union flag. We might also venture to say that were it not for the Union Jack there would be no Canada as there is today.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care Of Every Young Mother

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so sudden—sometimes without a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of babyhood and childhood. Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach; regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or better still, give him an occasional dose of the Tablets to ward off illness. The Tablets are sold by medicine dealers or will be sent to any address, post paid, at 25 cents a box by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

Tractors On the Farm

Western Farmers Investing More Heavily In Motors For Heavy Duty

There are in Alberta today 77,192 farmers who have 834,324 horses in use, and 10,225 tractors. In Saskatchewan records show 116,762 farmers with 1,199,566 horses, and 24,367 tractors. Manitoba has 51,200 farmers with 556,480 horses, and 10,833 tractors. The survey would indicate that while the horse is yet far from being a back number on Western Canadian farms, the day of the tractor has definitely arrived.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

Parachute Lands Plane Safely

Invention Of California Man Proves Feasible In Test

A small biplane has been landed safely from 2,000 feet by means of a huge parachute, without injury to its pilot or damage to the plane. The experiment, performed privately at Tracy, Cal., was designed to prove the possibility of using a parachute for disabled planes to insure safety of passengers. A Jenny biplane, piloted by E. J. McKeown, was used in the test.

The plane dropped about 2,000 feet with its motor idle, when the huge parachute, more than 100 feet in diameter, opened out. McKeown stayed with the ship as its speed rapidly slackened. He said he felt only a slight jar when the plane landed and the folds of the parachute enveloped him. The biplane was not damaged except for a minor bend in the tail skid.

The parachute is the invention of Charles Roderick, San Francisco, who with numerous other airmen, expressed complete satisfaction over the result of the experiment.

Progress Has Been Made

Sending Messages By Beam System Is Marvel Of Speed

What beam wireless has done for long-distance communication was explained by J. H. Thompson, chief engineer of the Marconi Wireless Company, to the members of the Montreal branch of the Engineering Institute of Canada, recently. Using slides, the speaker produced a graphic picture showing a telegraph operator at Drummondville, Quebec, using an instrument resembling an ordinary typewriter and sending messages at the rate of 150 words to the minute, to be received almost instantly by an operator at Dorchester, England.

Mr. Thompson illustrated the progress made in wireless transmission by showing the crude instruments used in the early days of wireless, the progress having been so rapid that equipment of stations used 15 years ago is of no use today. The beam system itself, he said, was the result of experiments by which all the energy available at the sending station was successfully sent in one direction thus establishing a beam of energy.

Seed Growing In B.C.

Industry On Vancouver Island Rapidly Increasing In Importance

Seed growing is one of the latest industries of Vancouver Island of steadily increasing importance. Vancouver Island sweet pea seed sells on the English market from three to four shillings per pound more than the California seed. The largest sweet pea seed farm is at Duncan which produces yearly about two tons. From 15 to 20 women are employed each year to pick, clean and pack the seed whose excellence and high quality is becoming world-famous.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

B.C. Grows Bermuda Onions

Bermuda onions have been successfully introduced into British Columbia, and will be grown for the early markets from sets imported from the Southern States. Last year eighteen acres were planted at Kelowna in an experimental way with satisfactory results. The onions cured well and yielded eight tons per acre. The acreage has been greatly increased this year. The crop should begin to move to market about July 1.

Some men are sentenced to hard labor for life and some do it of their own accord in order to make ends meet.

ECZEMA IN RASH ON HANDS Troubled For Three Years. Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a rash and then formed blisters. It troubled me much worse in winter so I could hardly put my hands in water or be near heat. My hands were terribly inflamed and disfigured. I had to wear old gloves to keep from scratching.
"I saw a Cuticura Soap and Ointment advertisement and sent for a free sample. I got relief from it so I bought more and after I had used them for three months I was healed."
(Signed) Miss Beatrice Aiken, Highwater, Que.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample Each Free by Mail. Address Canadian Depot, "Bathhouse Ltd., Montreal." Price, Soap 25c, Ointment 35c and 60c, Talcum 25c.

OCEAN STEAMSHIP SERVICE

White Star Line Paying Particular Attention To the Canadian Trade

The importance of the Canadian route was a point strongly emphasized by Lord Kysant at the annual meeting of the White Star Line held in London, Eng., on May 16th, according to cable despatches to the White Star Line in Montreal.

Lord Kysant, chairman of the Board of Directors, and an outstanding figure in world shipping, recalled the days of 1871, when the S.S. Oceanic inaugurated the White Star Line Steamship Service across the Atlantic, and from that date he traced, by progressive steps, the development of the company.

The shareholders of the company now number about 15,000, he said, "and after providing for the depreciation of the fleet, and paying the dividend on the preference shares, we recommend a dividend of six per cent. on ordinary shares and the balance carried forward."

"There was," he said, "a slight increase in the number of passengers travelling to and from the United States of which we secured a fair share," and from this point he went on to state that "we have, for some time past, been giving our most serious consideration to the important question of the construction of a new express mail vessel so that we may continue to maintain the position and traditions of the White Star Line in the North Atlantic trade."

Lord Kysant announced that the company has under construction at Belfast a "passenger motor vessel of over 26,000 tons which we expect to put into commission in the Fall of 1929. She will be not only the largest passenger ship engaged in the New York-Liverpool trade, but also the first motor passenger vessel to be placed in that service."

"We have," he continued, "given particular attention to the requirements of the Canadian traffic. In addition to our regular service from Liverpool to Quebec and Montreal, in which we have placed the new Laurentic, we have established a service from London, Havre and Southampton to Quebec and Montreal, so as to cater more especially to south of England and continental passengers travelling to and from Canadian ports on this service."

"From Channel ports we have placed the Albertic and the Megantic, the former vessel being the largest ship to Montreal."

After mentioning that the White Star Line have transformed the Adriatic, 24,500 tons, into a cabin steamer, thereby having the largest cabin steamer in the world, Lord Kysant dwelt on the importance of the tourist third cabin traffic. In effect, he said, that this accommodation has enabled many with the desire to travel, but who, previously, had not been able to gratify their wishes, to realize their ambitions.

"The White Star Line," he continued, "is carrying a larger share of this class of travel than any other company. Passengers in this tourist category are assured comfort and good catering combined with exceptionally low rate passage money for the return voyage."

In dealing with the emigration question, Lord Kysant said that "shipping companies engaged in trans-Atlantic trade used to carry large numbers of emigrants from Great Britain and Ireland and other countries in Europe, but the United States immigration restrictions have reduced this traffic to comparatively small proportions."

"The Dominion of Canada also has imposed regulations upon immigration from the continent. The flow of emigrant traffic across the Atlantic has been thus much curtailed and a valuable source of revenue for vessels adapted to carry large numbers of emigrants has been greatly diminished. We hope that in time, restrictions may be considerably modified, at least in favor of settlers of British stock."

Mr. Derek Oldham, the English actor, is telling a good story against himself. One day recently he was stuck in a traffic block and was sitting in his car practising singing scales. He did not realize that the windows of the car were down, and he suddenly became aware that a taxi-driver was looking at him in a queer way. Turning to Mr. Oldham's chauffeur, the taxi-man shouted out, "Lumme, I thought summat 'ad gone wrong with yer exhaust!"

A man could learn a great many things if he didn't think that he already knew them.

For Hay Fever—use Minard's.

The average man prides himself on the possession his neighbors can't afford.

Swedish Air Service Safe

No Damage Or Loss In Three Years Of Operation

Three years of operation without an injury to a passenger or damage or loss to merchandise or mail is the record of AB Aerotransport, the corporation that carries on all commercial aeronautics in Sweden. The company has just announced that during this year 622 of the 640 planned trips were performed. It is subsidized by the government, and conducts regular air service during the summer months, between Stockholm, Helsingfors, Malmö and Amsterdam, and assists a German concern in operating the latter's line from Stockholm to Berlin. The route covered probably will become a stage of the London-Leningrad line.

The Oil For the Athletic.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years, have been using it can testify to its value as a lubricant.

Increase In Acreage

Increase in acreage of every grain in the Lethbridge Railway division. With an increase of over half in rye, is shown by the first crop report of the Canadian Pacific Railway.

The only thing a man wants, after he gets all the money he needs, is more money.

How Much Water Should Baby Get? A Famous Authority's Rule By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent. bottles contain thirty-five doses.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

One spoonful of this harmless,

Railways and Aircraft Companies In United States Join Hands To Supply Transcontinental Service

This aviation generation will probably not be able to annihilate space, but it is certainly destroying distance. Air lines to the other planets and the nearer stars are not yet in sight, but the stretches of the earth are being turned into aerial taxi jaunts. Also, as is man's habit when he is determined to cover great distances in brief time, the earlier hardships of swift travel are being eliminated. The latest combination of speed with comfort is announced in the formation of the 'plane-train service to Los Angeles from New York and return.

It has not yet been begun, but the personnel of its sponsorship assures its early establishment. Within a few weeks it will be possible to reach Los Angeles in forty-eight hours from New York, with two nights of sleep aboard a Pullman. Two railroads—the Pennsylvania and the Atchafalaya, Topeka and Santa Fe—the two leading aircraft companies—Curtiss and Wright—and many strong banking houses have combined in the project. Capital stock up to \$5,000,000 has been subscribed with no public offering, and the company is about to publish its rates, its time schedules and the names of its pilots. The 'planes, which will carry transcontinental passengers during the daylight hours, have a capacity of fourteen persons each; meals will be served in the air as on the Pullmans; and the tourists will be in their hotels at Los Angeles or New York before the light fades on the second day. It is part of the new miracle wrought by the union of science and finance, with 'planes and railroads acting as auxiliaries instead of rivals. Passage by air has become a conventional daily affair in Europe, where generally the scope of men's business interests requires a journey only from one country to another and without the handicap of such distances as we have here. To meet the spread of this broad land the new combination has been devised by men equally responsible for management and for transportation. It may be only the beginning of an entirely new system of general travel in this country.

Trips to the moon will probably have to be left to succeeding generations, which will have left only interstellar spaces as their objective. But news like this about the train-plane almost leads ordinary citizens to expect a time when their vehicles. Pullman cars by night will take wings by day and, rising from the tracks, carry them through the air until night comes again.—New York Times.

Beef Cattle Market

Good Prices Are Secured For Prime Beef

J. T. McCallum, of Melita, Manitoba, last month sold 24 head of prime beef grade Shorthorn and Hereford steers at prices ranging from \$10.50 to \$12. per hundred pounds to a Winnipeg buyer. The same buyer purchased 15 Aberdeen Angus steers from George Tait, a well known breeder, of Warren, Manitoba, for \$11.50 per hundred weight. These steers dressed 62.5 per cent. They were purchased last October for \$7.50 per hundredweight. At that time they weighed 1,015 pounds, which had increased on farm grown feed to 1,308 pounds at time of slaughter. The grand champion car lot at the Calgary and Edmonton spring shows was sold at \$15. per hundredweight. They were Herefords and were raised by W. P. Fleming, of Calgary.

Kind Old Gent: How old are you, my little man?

Small Boy (tersely): Eight.
"And what are you going to be?"
"Nine."

"Can you lend me ten kroner, old man?"
"On principle, I never lend money on the first of the month!"
"But today is the second!"
"The second? Yes, and I never have any left on the second!"—Kasper, Stockholm.

W. N. U. 1738

"R.O.P." Copyrighted

Title For Policy Of Record Of Performance Poultry Is To Be Protected

The Department of Agriculture announces that the term "R.O.P.", the popular title for the policy of the Record of Performance for Poultry, has been copyrighted by the Dominion Live Stock Branch, from which office the policy is administered. The purpose of copyrighting is to prevent the fraudulent use of the term in advertising. The widespread popularity and demand for Record of Performance poultry have made the move necessary for the protection of farmers and poultrymen desiring to secure R.O.P. stock.

Many commercial hatcheries are using R.O.P. males to head the flocks from which they secure eggs, and while the Department is encouraging this practice, it also intends to insure that genuine R.O.P. stock is so used and advertised.

Definitions are at present being drafted defining the various classes of R.O.P. stock—males, 'males, chicks, pens, etc. These will be made public when adopted, and will be the official definitions under the discretionary power granted the Dominion Live Stock Branch through the copyright.

Building Elevators Rapidly

A new grain elevator every two days has been the record established by the Manitoba Wheat Pool since building operations began this spring. Close to eighty new elevator points have been organized this year, and new elevators will be erected at nearly all of them. In building these Manitoba Pool Elevators over three hundred men divided into fourteen crews are employed.

POPULAR BRIDE-ELECT

Miss Margot Fleming, of Ottawa, arrived in Quebec recently aboard the Cunarder "Ausonia," en route to Ottawa, where she is soon to wed Viscount Hardinge, A.D.C. to his excellency the Governor-General.

Not Always To Blame

Increase Of Crime Not Altogether Due To Foreigners

The annual report of the Superintendent of Penitentiaries states there were 2,480 inmates at the close of 1927. Of these, 1,847 were born in British countries, and 633 in foreign countries. In detail it is stated that 1,540 were born in Canada, 177 in England and Wales, 40 in Ireland, 61 in Scotland and 29 in other British countries. Of the 633 foreign-born 209 were born in the United States but their antecedents are not given. As 62 per cent. of the penitentiary inmates were born in Canada we should not blame foreigners unduly for the increase of crime.

To Study Distance Of Stars

W. F. Harper, assistant director of the Dominion Observatory at Victoria, B.C., told the members of the Royal Society of Canada, that at the Victoria observatory a study was being made to determine how far away the stars were from mother earth.

Roman roads built before the birth of Christ are now lighted by electricity.

The wise worm doesn't crawl out until after the early bird has eaten his breakfast.

Ultra Violet Rays

Benefit To Poultry

Effects Greatly Increase Egg Production Says Vancouver Man

News dispatches from the East a few days ago told of the experiments being carried on by a university professor in studying the effects of ultra violet rays on poultry.

There is nothing new in this for Herbert Trafton, Vancouver poultry man, who has been using ultra violet rays in his henhouses for months. Unlike the Eastern professor, however, Mr. Trafton has not yet attempted to control the sex of offspring for hatching. He may carry on some experiments in that direction later.

"You can use too much rays of course, but when properly controlled it will work wonders with poultry," said Mr. Trafton. "It has increased egg production tremendously. Some of my hens that had been laying two or three eggs a week evidently with the idea that that was enough have, under the influence of ultra violet rays, taken a new outlook on life and laid eggs daily for eight or nine days at a stretch. Another advantage in the use of the rays is that it brings out the sex characteristics in chicks much earlier. And another thing: The rays are sure death to all parasites affecting poultry and in that way accomplish a great deal towards improving the health standards of the flock."

Farm Girls Win Prizes

Twelfth Annual Farm Girls Rally At University Of Saskatchewan

Prizes for the various judging competitions held in connection with the 12th annual farm girls' rally at the University of Saskatchewan recently were presented at the closing entertainment of the conference at Saskatoon.

Margaret Qually and Margaret Gerdis, comprising the Wilcox team, won the grand aggregate prize, the Saskatoon exhibition board cup, which will be held for one year. Each girl also received books from the university. Mary Duke, of Kennedy, was the individual winner.

Dairy products—Weyburn team: Ruth Peterson and Olive Pettit; individual, Ruth Peterson.

Bread—Kennedy team: Mary Duke and Alice Tillotson; individual, Beatrice Day, Mossbank.

Poultry—Wilcox team: Margaret Qually and Margaret Gerdis, individual, Mary Baptiste, Lacrosse.

This year 120 girls entered the competitions.

A Toronto controller wants to know if there is any difference between stealing a dollar and stealing a million dollars. There is the trifling difference that one crime usually involves a term in jail.

English Visitor Sees Excellent Prospects For the Growth Of Sheep Industry In Canada

Mosquito Control

Circular Gives Instructions Regarding Permanent and Temporary Control

The females of the majority of species of mosquitoes drink blood, and warm-blooded animals and man are the sources of this particular form of mosquito food. This makes the mosquito an interesting subject for study, and a circular, just published by the Department of Agriculture, entitled "Mosquito Control in Canada," is timely.

While some of these predacious insects only live for a few days others live for several weeks, and the best way to control them is to make an attack on their breeding grounds. The Entomological branch advocates in this circular the draining and filling in of low places where water accumulates, and the screening of receptacles holding water such as water-barrels. Temporary bodies of water formed by melting snow, rain and floods are common breeding places for mosquitoes.

"Mosquito Control in Canada," which may be obtained on application to the Publications Branch, Department of Agriculture, Ottawa, deals at length with the life history, permanent and temporary control measures, procedure in control campaigns, and protection from mosquito bites. Those who desire to identify the particular species common to their district may send specimens for identification to the Dominion Entomologist, Ottawa.

Canadian Handicraft Guild

Branch Has Been Formed To Carry On The Work In Alberta

A branch of the Canadian Handicrafts Guild has been formed in Edmonton, Alberta, to carry on the work in Alberta. This is the third branch of the Guild to be formed, Manitoba and British Columbia having formed local Guilds during the winter. Formation of such branches is the aim of the Guild, which obtained a Federal charter as far back as 1906.

Plate Glass Plant For Fort William

It is announced by Frank Spence, M.L.A. for Fort William, that the Feldspar Glass Company, of Oshawa, intends locating a factory at the head of the lakes for the making of plate glass. The company is negotiating to take over the plant and equipment of the Canada Steel Co., located on the Kaministiquia River, with both rail and shipment facilities at hand. The new industry is expected to give employment to about a hundred workers.

When I started out in the world I had but a dollar.

"What did you do with that?"
"Wired home for some more."

CANADIAN ORATORY CONTEST

For the second year in succession, the Canadian Oratory Championship, held at Toronto Arena, attracted a phenomenally vast audience, numbering nearly ten thousand. These photographs show, at the left, Wm. Fox, Jun., of De La Salle School, London, Ont., declared champion of Canada by the judges, who numbered five, one nominated by each of the participating provinces. Upper right, Miss Swanild Matthison, of Duke of Connaught High School, New Westminster, B.C., who was declared second, and lower right, Miss Alice Muse, of the Roblin Consolidated School, Dauphin, Manitoba, who came third. The other contestants were Miss Margaret Kinney, of Victoria High School, Edmonton, and Edison Smith, of Pownal, P.E.I. Fox gets a free trip to Europe after which he will represent Canada in the international contest at Washington.

A bright future for the Canadian sheep industry is painted by S. B. Hollings, editor of The Wool Record, of Bradford, the wool-marketing centre of England. Mr. Hollings visited this country in 1927.

"As I travelled through Ontario, Manitoba, Alberta and Saskatchewan, I could not help asking: 'Where are the sheep?'" writes Mr. Hollings. "Apart from passing a small flock or two on the train I had little opportunity of seeing them."

"It was too early to see any of the new clip, much as I desired to do so. The wool I saw was specially suitable for hosiery manufacture. This will always be a big industry in Canada, the climate making warm underclothes essential. The mills are evidently doing their best with the raw material available, and I was pleased to see that farmers are keeping a suitable type of sheep. I should say that the bulk of the wools range from 50's to 56's quality. I was asked if I thought manufacturing needs are such that the flocks in Canada could be increased to 25,000,000, and unhesitatingly replied in the affirmative."

"I have never known a time in the history of the wool trade when the outlook for sheep men was so encouraging. I am not among those who anticipate lower prices. Mutton values are also good, and I think the outlook is of the best. While every other class of farm produce has fallen in value in England during the past two or three years, those who have kept sheep have found both mutton and wool to sell well. I would appeal to every Canadian farmer to keep as many sheep as possible, because I think it will pay him to do so. Since returning home I have given three lectures on my trip to Canada, and in these as well as on every other possible occasion, I have endeavored to emphasize the opportunities in Canada for any one with sufficient pluck and enterprise."

"One of the most satisfactory things about my trip was that I met so many Yorkshiremen who had gone out to Canada and made a success of the enterprises upon which they had entered. Sometimes discouraging comments are made upon industry in the Old Country, particularly its agriculture. I hope Canadian readers will not accept all such comments literally, for there are many prosperous farmers in England."

"If Canada is to fill its place in the Empire it needs men of the same type to extend its pastoral and agricultural interests. Quite a large number of Englishmen with a good knowledge of the sheep of their native country have settled in Canada, and these should be able to give some good advice, particularly after they have lived long enough in Canada to become acquainted with its climatic peculiarities."

Farmers' Profitable Venture

Farmers Of Manitoba Own Creamery Valued At \$90,000

Since the Manitoba Co-operative Dairies, Ltd., Winnipeg, began operations in 1921, it has returned to its farmer patrons in interest and bonuses, in cash or credit, nearly \$75,000, according to a recent report by the management. During the same time the members of the association have subscribed and paid for capital stock in the organization to the amount of \$77,202. Thus the farmers of Manitoba now own the creamery and its equipment, valued at \$90,000, and have received refunds practically covering their investment. At the same time they have received better prices for their butterfat, and the quantity of butter produced has increased from about 300,000 pounds in 1921 to 1,637,000 pounds in 1927.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land" copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received. For more detailed information see the Bulletin "How to Pre-empt Land".

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for high-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands".

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers up to ten head.

Grapes, Figs, Artichokes, Chestnuts Among Potential Crops On Sumas

The peculiar fertility and climatic conditions of Sumas lake area constitute a distinct challenge to agriculturalists—those with initiative and resourcefulness—to prove the suitability of those lands for the growing of such crops as will best thrive there and bring adequate profit to the producer. A capable hop company has already successfully taken up that challenge, with the result that a half-million dollar yard is in brisk operation, with exceptional chances for winning a big profit, and at the same time, establishing Sumas "on the map" as a wonderful hop-growing district. South and west of the hop yards a number of Hungarians have taken up land, and, as expert tobacco-growers, are planting experimental, but substantial, acreages to that leaf, confident that they have the required soil and climate necessary for success. Then, in addition to the experimental areas of the provincial and federal governments, farmers located on marginal lands, with part of their holdings in the lake bottom, are doing their quota of pioneer cropping. But, with a promise of achievement perhaps outbreaching all the others, is the practical experimental work of Frank Beltrame, who is farming 37 acres of land near the main pumping station.

Grows Unusual Things

Frank Beltrame started out three or four years ago to grow—and is growing, for this latitude—some unusual crops. For the purpose, four main elements were required, fertility, moisture, abundant sunshine and adequate air movement. These requirements, difficult to find in combination, he considers are present in the location he has selected just west of the Sumas pumping plant on a somewhat narrow strip of land between Sumas mountain and Sumas river. Here, divided into two or three plots, is the foundation of the first Sumas lake vineyard—and a sturdy foundation it is. Three-year-old vines, mostly Muscats, heavy with blossom, cleaned, trellised and placed in orderly lines—just as in Mr. Beltrame's home district in Italy. Utilizing the lanes between the vines are other healthy growths—artichokes, (3 feet high, in heavy blossom), hemp and tobacco plants, endive, and a variety of remarkably developed English walnut, sweet chestnut, and hickory nut trees. And against a warm ditch bank, enjoying a southern exposure, is Mr. Beltrame's fig tree—small, but taking plenty of nourishment, and looking quite as well as its arboreal cousins nearby. All these things depend primarily upon heat, and plenty of it, for their well being. Mr. Beltrame explains in this respect that his vineyard becomes extremely hot at certain seasons, a very warm air movement following along the base of the Sumas mountain, probably caused by retention of sun-heat on the nearby slopes, combined with which is an humidity created by soil under-moisture.

Grapes Main Crop

Growing of table grapes is to be the specialty of this progressive Italian-Canadian, and it is an industry in which he has abundant faith. There is one fear that Mr. Beltrame has, and that is appearance of a root-fungus, which has caused widespread destruction in vineyards throughout northern Italy, France and other parts of Europe. Once the spores of this disease get into the soil, they cannot be entirely eliminated, but will spread and kill the entire vine root within two or three years. For this reason, Mr. Beltrame maintains that the importation of young vines from Europe should be carefully regulated.

Ships' anchors foul trans-harbor cables

Ships' anchors are deadly enemies of the two transharbor cables which provide for all telephonic communication between Vancouver City and North Vancouver.

Five times during the past nine years, one or the other of these cables has been fouled by the anchor of a steamer. The resulting strain on the cable causes the telephone lines in it to go "bad", and interferes with service between the north and south shores.

Last April the 100-pair cable was the victim, and until it was repaired the smaller 50-pair cable carried the burden of trans-harbor calls.

Enjoyable Concert At Poplar

Poplar Manor W. I. gave an enjoyable concert on Saturday last in the community hall, clearing a nice profit. Artists from Vancouver, Peardonville and Abbotsford assisted local talent in rendering a fine program. Songs were contributed by Mrs. Thorn, Mrs. Ross, Mr. Gates and Mr. Rowley, and Mr. A. Welch gave several selections. Mrs. Heywood, Mrs. Welch and Miss Tebbutt entertained with recitations, and Mr. Gates provided a hearty laugh with a humorous sketch. Mrs. Gates and Mrs. Lait ably assisted at the piano.

School Picnic At Cultus Lake

Pupils of Divisions 1 and 2 of Abbotsford Public School held a picnic at Cultus Lake last Wednesday, under the care of Principal Stewart and Miss Stenerson. About 50 of them were taken to the resort by truck, and the others transported by kindness of Mr. Shore, Mr. G. Pratt, Mr. E. Webster, Mr. Hill and O'Nay Fraser. During the afternoon, games were played, and many found amusement in swimming and boating.

A refreshing supper was served at 6 o'clock by Miss Stenerson, assisted by Mesdames Hill, Jackson, Stewart, Stobbs, Jackson and Bennett. The party returned home at about 9.30 p.m., tired, but satisfied with the happy day. Thanks of the teaching staff and pupils is expressed to those who provided cars, and to Mr. J. K. Fraser, Mr. Hunt and Mrs. Switzer for donating chocolate bars.

Honor Memory of Late Colonel Ham

Newspaper women from many parts of Canada, officials of the Canadian Pacific Railway and friends gathered recently in Montreal to honor the memory of the late Col. George Ham, founder of the Canadian Women's Press Club and for many years active in publicity work of the Canadian Pacific Railway. A bronze memorial bearing a medallion likeness of the late Col. Ham was unveiled in the Windsor Street Station, the gift of the Canadian Women's Press Club, as a tribute to the founder of their organization.

The memorial bore the following inscription: "To the memory of Colonel George Henry Ham, official of the Canadian Pacific Railway, who died in Montreal April 16th, 1926. This tablet is erected by the Canadian Women's Press Club in grateful recognition of his services as their founder and friend. He was a gallant gentleman and great of heart."

Following the unveiling by Miss May S. Clendennan, president of the C.W.P.C., the permanent memorial was accepted for the Canadian Pacific by E. W. Beatty, chairman and president of the Company.

In reply Mr. Beatty said: "I accept this tablet on behalf of the C.P.R. with a great deal of appreciation and gratitude to the members of your club. It is very appropriate that it should come from the Canadian Women's Press Club to the C.P.R. because of Col. Ham's association with both. I well remember his jocular references to his rather unique distinction as a member of your club. I also remember how proud he was of his membership."

"It is equally appropriate that it should be here under the roof of the building in which he spent so many glowing and useful years."

"I myself had an association with him for over a quarter of a century. He was always the same genial philosopher. I don't think I ever met a man who had the ability to say in semi-serious or humorous way the great truths Col. Ham was able to say. He had three outstanding qualities—kindness, courage and loyalty. His kindness not only showed in his ability to say witty things, I don't think any man or woman applied to George Ham during his long life who did not receive an immediate response. He showed courage in spite of physical disability and mental depression. He was loyal to his friends, loyal to his company, and very loyal to his political affiliations. He had a religious side he did not speak about, evidenced by his constant help of other men."

"And so, ladies, in accepting this tablet, which expresses so appropriately what we feel, I would say that in this place where thousands of employees of this company pass every week, it will be a constant reminder of the man and of his acter. Junior members will learn from it, and I hope its presence will be an inspiration to them. I will remember, too, that duty to give happiness is not the least of human virtues."

Hop Crop Of Exceptional Promise Maturing On Sumas Prairie Vines

If the weather continues as perfect
as during the past few days, one of the
Sumas district's newest crops, hops,
will yield a record harvest—quite as
likely as not to be the heaviest on the
continent. Vines in the Canadian Hop
company's yards are not only further
advanced than most in the Sards and
Agassiz areas, but in the opinion of a
prominent grower from Oregon, who
visited the lake yards last week, are in
a better condition than any he has
inspected in the northwest.

From 50 to 100 hands are engaged
in the Sumas yards just now weeding
and keeping the vines clean and in
proper condition. Comfort and good-
health of the pickers is a matter of
concern with the company, especially
this year, with a bumper harvest in
sight, and improvements are being ef-
fected and quarters enlarged to ac-
commodate a large number. Water is
being piped to convenient points, and
sanitation is to be given particular at-
tention.

Continued hot weather will mean an
early harvest, and H. M. Ord, manager
of the local company, is making pre-
parations to start picking two weeks
earlier.

Conservatives Expect Hon. H. H. Stevens To Speak In Abbotsford

Wm. Atkinson, Conservative nominee,
is preparing for a heavy program of
meeting engagements in pursuing his
political campaign during the next two
weeks, and is billed to speak at follows:

Tuesday, June 26—Kilgard and Strat-
ton schools.

Thursday, June 28—Poplar and Pear-
donville community halls.

Tuesday, July 3—Mt. Lehman and
Gifford.

Thursday, July 5—Bradner and Aber-
deen.

Saturday, July 7—Abbotsford.

Tuesday, July 10—Huntingdon and
Upper Sumas.

Thursday, July 12—Matsqui and
Clayburn.

The local Conservative committee ex-
pects to secure Hon. H. H. Stevens' at-
tendance at the Abbotsford meeting,
and R. L. Maitland at the Matsqui
meeting.

Roads and Bridges

ROADS AND TRAILS

1916 26,220 MILES

1926-7 31,900 MILES

BRIDGES: The present valuation
of 63 miles of Bridges is \$8,480,000

UPON the arteries of communication depend the
settlement and growth of the nation. First the
trails... then the rough oxcart ruts... the wagon roads
... the automobile highways.

The scattered population of British Columbia
has made the construction of roads between
centres a matter of vital importance, yet one
of almost insurmountable difficulties.

Mountain sides have to be blasted away...
clefts and chasms tresselled... rivers bridged!

With the opening of the Cariboo Highway
through Fraser Canyon in 1926, the last link
of British Columbia's great arterial highway
... a highway unexcelled the world over as an
engineering feat and one of unmatched scenic
beauty... was forged.

Eastern British Columbia greeted its western
brothers! Markets and railways were brought
closer to the farmer, the miner, the industrial-
ist. New fields for agricultural and trade
development were opened up.

For the ten years just past, an aggressive
highway programme has been carried out.
Thousands of miles of good roads and dozens
of sturdy bridges have been built.

Our roads system now totals 31,900 miles...
an increase of over 5,000 miles during the last
ten years. Of this mileage, 12,000 miles are
earth roads; 4,000 gravel roads; and 1,000

macadam, bituminous, concrete and cement
concrete. The 5,000 miles which were added to
our roads system include: 884 miles of main
trunk roads, 602 miles of lateral roads, 281
miles of industrial and mining roads, 1,133
miles of settlement and farm roads, and 2,000
miles of ordinary and mining trails.

During the years just before 1917, a large
number of bridges had been constructed in the
Province, nearly all of which were temporary
timber structures. Since 1917, the problem of
maintenance and renewal of these structures
has been a serious one, involving a large ex-
penditure, particularly between the years 1920
and 1927.

The policy has been to improve design of and
workmanship on temporary bridges and to
renew all the large bridges on main highways
over the principal rivers with concrete and steel.

Today, the valuation of our 63 miles of
bridges is nine million dollars.

This construction activity has distributed
wages and salaries over our whole Province
and has been a material aid in bringing about
the current period of British Columbia's
prosperity.

Read these announcements and understand your province's
progress... clip them out and send them to friends. If you
desire extra copies of these announcements a note to this
newspaper will bring them. Advertise your Province!

Shorter Route Opened To Cultus

By the opening of a road from Sumas
flats to the old Yale road skirt-
ing Vedder mountain, a much shorter
route is now available from Abbots-
ford to Cultus Lake and Vedder Cross-
ing area. The new road starts from
the interprovincial highway, just south
of the hop-fields, reaching the moun-
tain road at Mr. H. N. Ord's residence,
near Yarrow, eliminating several miles
of grades and curves.
The mountain road, undoubtedly one
of the most delightful scenic drives in
the district, despite its contours, is in
a sorry condition—overgrown, full of
chuck-holes, and in many places al-
most washed out, with bridges in an
unsafe condition. Surely something
could and should be done to maintain
this alternative highway in passable
and safe condition? Not only for its
scenic value and importance to those
resident along the route, but as a
secondary route across the prairie
which might become of extreme value
in event of flooding or other unfore-
seen condition on the lake road.

Mr. Spradley, pastor of Sumas Taber-
nacle will preach in the Full Gospel
Mission, opposite Abbotsford post of-
fice next Sunday afternoon. In the
evening Pastor Mobbs takes the pulpit.

Canada's Basic Industry Sound

Agriculture In Canada Prosperous According To Dominion Statistics

Agriculture is Canada's basic industry, and agriculture is prosperous. According to the Dominion Bureau of Statistics, the Dominion's gross agricultural revenue was \$1,389,394,000 in 1922 and \$1,736,439,000 in 1927.

This represents an increase of approximately 25 per cent. in five years, and the percentage of increase in the gross agricultural wealth of the country for the same period is only slightly less. The figures are: \$3,743,685,000 for 1922, and \$7,963,460,000 for 1927.

For all Canada, occupied farm lands increased in value to the extent of \$1 an acre in 1927 as compared with 1926 and last year stood at \$38 according to the bureau.

Farm lands in British Columbia last year had an average value of \$89 an acre, an increase over 1926 of \$9 and a figure far beyond that of any other province. Much of British Columbia's arable land is found in fertile valleys where it is cultivated extensively for fruit growing or market gardening. Saskatchewan, the greatest grain province, had an average of \$26, with an increase in the year of \$1. Ontario increased its average from \$62 to \$65, and Quebec from \$53 to \$57.

The increased value and number of livestock is another evidence of prosperity. Canadian horses, cattle, sheep, swine and poultry in 1926 were valued at \$747,509,000; in 1927 the figure had gone to \$862,097,000, most of the increase being in cattle.

There are no figures in existence to show the extent of farm indebtedness in the Dominion, but apparently in most cases mortgages are being carried without embarrassment. A few years ago there were sections in Western Canada where farms freely were being abandoned to the mortgage companies. Today, after a succession of profitable crops and in a healthier atmosphere of optimism, this condition no longer exists. It is interesting to note that according to the latest census 85.7 per cent. of all Canadian farms were occupied by their owners, showing the numerical insignificance of the tenant class.

Color Matter Of Preference

Brown Shelled Eggs Laid By Common Hens, White By Others

Color of the shells does not affect the food value of eggs. This statement from the poultry department of the University of Wisconsin College of Agriculture may be accepted with certain reservations by housewives who have always insisted on "white eggs" or "brown eggs." Color is entirely a matter of local preference, say the Badger poultry specialists, and as a result eggs of the color most commonly requested on any market are considered by the buyers in that community to be of superior quality.

Brown-shelled eggs are laid by common breeds, as Barred Rocks, Rhode Island Reds and Wyandottes, while white-colored eggs are produced by Leghorns, Minorcas and other Mediterranean breeds.

A Good Insurance Risk

Although he carries a blanket public liability insurance policy for \$100,000 on any air craft he may be flying, Col. Charles A. Lindbergh has not presented a single claim for damages in the thousands of miles he has flown since he piloted the Spirit of St. Louis from New York to Paris. This has been announced by the insurance company.

Raise Largest Potato Crop

Prisons of Manitoba and Saskatchewan raise two-thirds of the potato crops reported by penal institutions of the Dominion. Nearly a third of a million pounds of potatoes are dug up every year at Stony Mountain, and nearly as many figure in the yield at Prince Albert.

"I saw a dog with five legs the other day."
"Where was the fifth leg?"
"In its mouth!"—Vikings, Oslo.

KEEPING CREAM COOL

Putting Cream In Can and Placing In Iced Water

With the arrival of warm weather cream producers who patronize a butter factory are faced with the problem of keeping the cream sweet and clean in flavor until delivery is made. Authorities of the Dairy and Cold Storage Branch, Department of Agriculture, Ottawa, express the view in pamphlet No. 37, entitled "Care of Cream For Buttermaking," that the easiest and best way is to put the cream in an ordinary shotgun can and place it in a tank of iced water immediately after skimming. This pamphlet shows an illustration of a suitable tank capable of holding four cans and sufficient ice and water to keep the cream at a low temperature. The tank is made with a space of four inches on all sides and on the bottom which is filled with planing-mill shavings. The cover is also insulated in a similar manner. The tank is lined with galvanized iron.

This tank, although regarded as a little expensive, is highly recommended on farms where the ice has to be conserved. An ordinary wooden tank makes a fair substitute. Whether tank is of insulated type or plain wood covers are of great importance, as they help to keep down the temperature of the water and cream.

This pamphlet, which can be obtained from the Publications Branch, Department of Agriculture, Ottawa, gives the results of an experiment which shows the great advantage of keeping cream in a proper tank over the usual practice of holding it in the cellar. In the tank cream held for sixty hours at an average temperature of 54 degrees Fahrenheit, developed an acidity of only 0.165 per cent. When kept in a cellar for the same period the average temperature of the cream was 63.7, which allowed the acidity to reach 0.505 per cent. That is to say, cream held in the cellar had three times as much acid as that cooled in the iced water.

Western Alberta Minerals

American Interests To Develop Immense Lead and Zinc Deposits

Some initial work is to be done this summer on the development of an immense lead and zinc deposit in the north country just above the Alberta boundary. Mineral rights in this area are held by a syndicate controlled, it is understood, by Boston interests, and the work proposed for the coming season will consist of sinking experimental shafts with a view to determine definitely the extent and character of the deposit.

A working crew will go north for this purpose soon after navigation opens.

The area to be thus developed is in the Great Slave Lake country about eight miles beyond the Alberta limits. It was prospected before the war and rights acquired from the original prospector by an English concern. Owing to wartime conditions, however, no development work was done, and the English holders dropped the claim.

It is said that competent geologists have declared the area to hold the richest body of lead and zinc ore on the continent. Merely as a surface proposition, there is believed to be millions of tons of ore in the deposit and if the tests now about to be made show the deposits to have the expected depth there will be an almost fabulous quantity of the two minerals out of which to make a new Eldorado of the north.

Already there are visions of great transportation activity on the northern waterways if the development of the lead and zinc deposit of the top country is proceeded with. Freight will necessarily go in and come out by way of the MacKenzie route, connecting with McMurray and the waterways rail line. Incidentally, lead and zinc may force an ultimate extension of the railway into the north, instead of oil.

Just a Report

A Negro preacher has pestered his bishop so much with appeals for help that the bishop finally told him with a tone of finality that he didn't want any more appeals from him.

The next week came another letter from the preacher:—

"Dear Bishop,—I assure you this is not an appeal. It is a report. I have no pants."

Important To Beekeepers

The artificial mating of queen bees by which the beekeeper in future can make sure that excellent strains of bees can be perpetuated throughout generations, with a resultant high grade of honey, was revealed by G. H. Gale, at the annual convention of the Manitoba Beekeepers' Association recently. The new discovery, he declared placed the industry on a controllable basis.

JOHN O'BRIEN,

The popular hotel manager of the Canadian National Railways, who will again be in charge of Jasper Park Lodge, Jasper National Park, Alberta. He has been manager of this Rocky Mountain summer resort since 1923.

Will Move More Buffaloes

Wainwright Herd Has Been Increasing Rapidly

It is expected that some 1,100 head of buffaloes, mostly year-olds, will be shipped from the Wainwright Park early in June to the range in the far northern part of Alberta, where, during the past three years several thousand head have been transferred. The former monarchs of the plains have increased so rapidly in their sanctuary at Wainwright that their numbers have far exceeded the carrying capacity of the pasture in the park. Reports from the vicinity of Fort Smith, on the northern boundary of Alberta, indicate that the animals which have been moved are thriving in their new home.

Assist Agricultural Colleges

In England and Wales there are seventeen institutions receiving grants from the ministry of agriculture. Six of the leading universities are granted money, though in no case does it exceed \$35,000. There are five colleges classified as agricultural, one as horticultural, a dairy institute, and a veterinary college. Altogether, the grants amount to \$225,000.

Hop Growing In B.C.

The John I. Haas Hop Company, of San Francisco, that now has 100 acres of land in hops at Sardis, B.C., recently acquired additional 80 acres just south of its present holdings, which will be trellised during the coming season. There were approximately 750 tons of hops grown in British Columbia last year, practically all of which have been shipped.

London Has Repair

Shop For Lifeboats

Those Put Out Of Commission Around Coast Are Immediately Replaced

In an out-of-the-way corner of the River Thames in the port of London is a lifeboat hospital. The doctors are all old sailors, most of whom have long been connected with the lifeboat service.

The hospital is the repair and store depot of the Royal National Lifeboat Institution. One enters, from the street through a small door, just as though going into an ordinary house, but once inside the similarity ceases, writes W. I. Seymour, in Pearson's Weekly. There are busy yards, machine shops, and store rooms where they keep a stock of everything necessary, from spare lifeboats down to metal polish.

Eight or nine lifeboats fully equipped, are always kept "standing by" ready to be rushed off to replace any that may be put out of action around the coast. Day and night someone is always on duty, prepared to summon all hands to dispatch a lifeboat immediately on receipt of an S.O.S. No station must be kept waiting.

Meantime the damaged lifeboat is being returned to the yard, and on arrival she is immediately overhauled, put into a thorough state of repair, re-equipped, and then put on stock, ready to take her turn again. No new boats are ever kept in stock—they go direct from the builders to the station for which they are intended.

Plant Has Peculiar Seed

Goat's-Beard Equipped With Parachute Which Expands and Contracts

Goat's-Beard, a European plant has a seed that could almost be said to walk. It is equipped with a kind of downy, ribbed parasol, or parachute, by which it drifts to a distance through the air, and by the action of which it is able to move along the ground after it lights. The effect of alternate sunshine and dew on the parachute is to make it expand and contract, so that unless the seed has landed on soil, where it can take hold, the ribs will drag it along day after day until a favorable spot is found.

New Homesteads In West

Over a thousand new homesteads were filed in the four western provinces during the months of January and February this year, being 1,026, as compared with 629 for the same two months' period last year. By provinces, Manitoba reports 74 homestead entries as against 71 last year, Saskatchewan 430 as against 333, Alberta 582 as against 213, and British Columbia 30 against 9.

Romance on C.P.R. Route

The Canadian spring had early influence upon Andrea Hansen, 21, and Neils Christian Nielsen, 23, handsome young Danish immigrant couple who, on arriving at Winnipeg, decided to marry and, with the assistance of the Canadian Pacific Railway Colonization Department officials, did so forthwith.

They had known each other in their homeland, Denmark, for many years, and had even been sweethearts, but on departing for Canada they had harbored no romantic ideas of thoughts of marriage. Travelling as strangers in a strange land, they met and found happiness in each others company during the journey, and furthermore discovered their destinations to be close together. On reaching Winnipeg on their westbound trip, they decided to marry, and the C.P.R. Colonization department officials did the rest.

Rev. N. Damskov, immigration chaplain, aided the groom in securing a special marriage license. His son Victor, a member of the colonization staff, hurriedly procured a fine bouquet from the florists as a gift to

the bride from the company. An office adjacent to the Winnipeg immigration hall was cleared and prepared for the occasion. C. A. Van Scoy, head of the colonization department of the railway for Western Canada, volunteered to act as groomsmen, and R. G. McNeillie, general passenger agent, to give the bride away; a group of twenty immigration and company officials gathered, and the stage was set for the ceremony, the first among newcomers for this season.

"Vil du have Andrea fur din elkte hustru?" asked Rev. N. Damskov.

"Ja!" responded Nielsen.

The chaplain pronounced a special prayer for their guidance as strangers in the new land, charged them to continue faithful to one another, repeated the Lord's prayer, gave the benediction, made the sign of the cross, and Andrea and Neils Christian were declared man and wife.

They continued their journey westward that afternoon, two out of four hundred settlers,—Danes, Dutch, and English,—who were travelling at that time with the Canadian Pacific.

NEW POPULAR BEVERAGE

Four Thousand Gallons Of Tomato Juice Consumed Annually At Health Resort

Tomato juice is a popular beverage at French Lick Springs, a well-known health resort, says The Modern Hospital. According to the manager, R. J. Tompkins, the guests consume over four thousand gallons of specially prepared tomato juice each year. In commenting on this, Mr. Tompkins says:

"In late years physicians and dietitians have demonstrated that the juice of the tomato contains many beneficial elements, the chief of which are the three vitamins, A, B and C, and the recently discovered vitamin E, which assists the red blood cells in absorbing iron from the blood. These are necessary for nourishing and strengthening the entire human organism."

"Tomato juice may be served plain or with a pungent seasoning in it," says The Modern Hospital. "One method of preparing it is to pour the juice out of the can and press the pulp through a sieve. Chill and season with salt and pepper. Add lemon juice, tabasco, or Worcestershire sauce, if desired or any other seasoning."

"The use of canned tomato juice has been growing ever since the discovery that the canning process acts as a preservative of vitamin C, which not only prevents scurvy but is necessary for growth and good health. Much of this conservation is due to the acid content of the tomato itself. In addition to vitamin C, tomatoes rank with lettuce and green string beans as a source of vitamins A and B."

"Increasing popularity of the tomato as a source of vitamins is due to the fact that it can be obtained all the year around at a comparatively stable price, and because the labor of preparing it for use is smaller than for almost any other source of the vitamins, a matter of importance in the hospital or health resort."

Will Not Incur Large Debt

But Highway Building In Saskatchewan Will Be Speeded Up

"No one had ever criticized the highway map of the Province and the type of earth road is as good as any built anywhere, and they are well designed," says Hon. Geo. Spence. The Saskatchewan Minister of Highways, Labor and Industry goes on to point out the economical aspect of highway building and graveling, which is being commenced this summer. "The Province is in a splendid financial position today. We are going to speed up but will not go head over ears in debt. Colonization is needed, but colonization is a human problem. You can't dump people into the country and not take care of them. Provincial highways had been built to serve points in the East, West, North and South, but no government can build more highways than the people can pay for. They must be built where they will give the greatest service."

"Air survey will be proceeded with this summer; the Dominion government will do this," he said. "They have the equipment but the provincial government will be able to give the information to the people. Tourist traffic by lake and river will be made a study, but until the fullest information is obtained no charts can be made. It would not be safe. The work of constructing the road into the new park in the North is under way. It will be completed in time for the opening of the park in August, and in July will begin the work of removing the loose boulders from the river and Montreal Lake. When this is done it will open up a fine waterway route in the tourist district."

The new scientific method is being used to inject into telegraph poles spreading paste that is said to keep fungi at bay. Many years are said to be added to the pole's life.

This treatment of wood is a step that may lead eventually to complete arrest of decay. If that ideal is accomplished, buildings of wood can be erected that will be as imperishable as structures of stone, brick or steel while the cost will be much less. The effect will be that of transmuting wood into rock.

No Argument

A new 5 and 10-cent store had been opened by a man named Cohen. A woman came in one day and selected a toy for which she handed the proprietor a dime.

"Excuse, lady," said Cohen, "but these toys are 15 cents."

"But I thought this was a 5 and 10-cent store," protested the customer. "Well, I leave it to you," came the reply; "how much it is, 5 and 10 cents."

Infatuated Youth: Thinking of me, darling?
Weary Girl: Oh, was I laughing? I'm so sorry.

If a man is smart he can catch on and if he is wise he knows when to let go.

The youthful graduate is the only person who knows enough to run the nation successfully.

A sky flecked with small white clouds is sometimes called a mackerel sky.

Crop Planning Of The Farm

Keeping a Record Of What Crops Are Grown In Rotation

In order to keep a record of what crops have been grown each year on all the fields of various parts of a farm, it is desirable to draw up a small plan of the farm. This plan may be written the crop which have been obtained. If desired such additional information may be recorded as dates of ploughing, seeding and harvesting. When this plan is made every year, it facilitates the following without error of any rotation which may be desired. It enables to learn what fields produce the best yields of certain crops, providing information to enable the improvement of the rotation along the line adapting certain crops to soils which they are suited. Observations may be recorded regarding the presence of weeds in various parts of a farm, where soil drifting has occurred, where manure has been applied and any other points of interest. Above all, such a plan provides a definite record of the results of year's work on the land and over a period of years is very instructive. Farming is a long-time business and records are necessary if much improvement is likely to be made.

Such a plan may be drawn in book so that many years' record will be kept easily available. It is possible to use a few pages in a book to make a record of all receipts and expenditures and record once a year an inventory of the value of all the equipment, livestock, and crops on the farm. The records, together with the cropping plan of the farm, give accurate formation of each year's progress on the farm and are the best means of studying how to improve the farm business. No commercial enterprise would consider the conduct of business without yearly records and neither should any farm enterprise. This method of keeping farm records is perhaps the most simple of a system but it gives, undoubtedly, the most fundamental information, and has the great advantage of being extremely simple and easy to do. If more elaborate system of accounts is desired, it may be adopted later. This advice is offered in Bulletin No. 98, entitled "Crop Rotations and Farm Management For the Prairie Provinces," available at the Publications Branch, Department of Agriculture, Ottawa.

The planning of the farm might make a very enjoyable and instructive task for one of the boys or girls. They are given sufficient instruction in school in mapping to be able to apply this to their own farms.

To Preserve Wood

New Tool Invented For Injection Paste Treatment

The practice of giving logs "hypodermic injection" to preserve them, invented in Germany not long ago, has spread to Britain, and a new tool has been invented to do the work.

The new scientific method is being used to inject into telegraph poles spreading paste that is said to keep fungi at bay. Many years are said to be added to the pole's life.

This treatment of wood is a step that may lead eventually to complete arrest of decay. If that ideal is accomplished, buildings of wood can be erected that will be as imperishable as structures of stone, brick or steel while the cost will be much less. The effect will be that of transmuting wood into rock.

Aviation In Western Canada

The developing "air mindedness" in Western Canada was recently illustrated when three passengers arrived at Moose Jaw from Winnipeg by special Western Canada Airways plane for the transaction of business this being the first business visit ever made by air to Moose Jaw. The plane later flew to Regina and then back to Winnipeg.

A good many things come to the man who is so busy that he has no time to wait.

Twin Brides Showered At Kilgard

Complimenting Mrs. Hugh Richmond and Mrs. Tom Kerr, recent brides, Mrs. Barker entertained at a delightful miscellaneous shower in the Kilgard schoolhouse on Friday evening. The gifts were presented by little Miss Vivian Golos and Master Ivan Golos (twins) in two wagons, decorated with tricolor streamers, kewpies and orange blossoms.

Mrs. H. Richmond, Sr., and Mrs. J. Kerr presided at the urns. Those who assisted in serving were Mrs. M. Golos, Mrs. Keeping and Mrs. Stratton. About 150 guests were present. Dancing was indulged in during the evening. Mr. Hardy being M.C. and Mrs. Thompson playing the piano.

This double alliance is interesting as the brides are twin sisters, and the grooms each one of a pair of twins. Mrs. Kerr and Mrs. Richmond taught school in Sumas, Wash. for several years, and both are active Rebekahs, Mrs. Richmond holding office of Noble Grand of the Sumas lodge.

Mr. Kerr is clay moulder at Kilgard, and Mr. Richmond moulder and brick setter at the same works.

The Kilgard general store, operated for 12 years by Mr. and Mrs. T. B. Stratton, has been purchased by Mr. O. W. Benedict, who has placed his son Donald in charge. Mr. Stratton will conduct his Stratton store and operate his farm in future.

ABBOTSFORD

J. Okulitch, Ware road, is erecting a new poultry house to accommodate 1000 birds.

Magistrate Bell granted Mrs. D. McKie, Abbotsford, a separation order for \$10 weekly against her husband in the local police court. She will reside at Sardis.

Fred Matthews of Upper Sumas road, has joined a Dominion Government Geological survey party, and is in camp near Banff, Alberta. He expects to be engaged all summer.

Messrs. J. Frith, W. S. Hill-Tout and J. Wilson have been named by local poultrymen to represent this district at a meeting called for Friday next in the Vancouver Board of Trade building for the purpose of outlining final operative details of the new pool organization.

Mrs. Knox, of Seattle, a sister-in-law of J. A. McGowan, is guest of Mrs. Nelson.

Mr. Clark Trethewey of San Francisco, was visiting Abbotsford friends last week.

Abbotsford baseball nine played the Mission team in the latter's grounds last week, the game resulting in a tie 4-4.

Miss Reid, R.N., of North Vancouver is a guest of Mr. and Mrs. J. W. Winslow, Huntingdon. She visited the Misses Wattle last week.

Misses Francis Benedict and Evelyn Nelson left for Berkeley, Cal., yesterday to take the summer training course given by the University of California. They travel by boat from Seattle.

E. Dickinson, president of B.C. Football Association, was in Abbotsford last week, arranging details of football schedules for the coming season.

Efficiency on the Farm

THE business executive is pictured in a city office with a phone on his desk and a row of buzzers. He personifies efficiency, brought about by the adaptation of Electric Power to business.

The same power serves in a similar way on the farm.

Just as the business man uses electricity to increase his capacity for constructive effort so, too, the modern farmer leaves routine duties to the power plant. The time he saves is profitably spent on improving his property.

BRITISH COLUMBIA ELECTRIC RAILWAY CO.

HEAD OFFICE

VANCOUVER, B.C.

BRITISH COLUMBIA

British Columbia, home of adoption, Pain I to thee would a tribute compose,

When I beheld thee first, clad in thy beauty,
What adoration within me arose.

Oh, not for me did the wide prairie spaces,
Hold out a luring and beckoning hand,

Farther and farther to westward I drifted,
Seeking in faith for the fair promised land.

Oh, could I tell how the first glimpse assured me
Here is a paradise mirrored on earth
Tears fell like summer rain, easing the heartache,
Memories returned of the land of my birth.

How incomparably grand is thy scenery,
Lofty and pure, rise the mountains on high,
Guarding the well watered, rich, fertile valleys,
Seeming to tell them protection is nigh.

Soft, downy, fluffy clouds, swathing the foothills,
Looking like lakes, capped with white, fleecy foam,
Stretches of forest in mystery enshrouded,
Giving God's creatures free license to roam.

Vistas of ocean blue set in like turquoise
Midst emerald islands, and brown sandy shore,
Silvery cascades in volume increasing
Mingling at last with the cataracts' roar.

Flowers in profusion and sweetness abounding,
Gay plumaged birds wing their way through the air,
Cheery brown songsters alight on the bushes,
Yielding their part to the picture so fair.

Thankfully then will I dwell in this province
Vivid expression of God's wondrous grace,
Gladly rejoice in it's beauties for ever
Till its Creator, I see face to face.

Sunday School at 10 a.m.
Service Sunday at 11 a.m.
In I.O.O.F. Hall, Sumas

TRINITY UNITED CHURCH
Rev. T. S. Paton, B.A., Pastor

Sunday Next—
Special Patriotic Services on Sunday, July 1st.

10 a.m.—Sunday School and Teen-Age Classes.
11 a.m. Subject: "Honour to Whom Honour is Due".

Sacrament of Baptism at this Service
3 p.m.—Services in St. Paul's Church Huntingdon.

7:30 p.m. Good Will Message will be Given by Rev. Stanley McGuire, of Sumas.

Special music by the choir morning and evening.
All Are Cordially Invited To Attend.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for repairs to Training Wall, Woodwards Channel, B. C.", will be received until 12 o'clock noon, (daylight saving), Friday, July 13, 1928, for the repairs to Training wall, Woodwards Channel, Fraser River, B. C.

Plans and forms of contract can be seen and specification and forms of tender obtained at this Department, at the office of the District Engineer, Post Office Building, New Westminster, B. C., also at the Post Office, Steveston, B. C.; Builders' Exchanges, 2509 Prior Street, Victoria, B. C. and 515 West Hastings Street, Vancouver, B. C.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions contained therein.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to 10 per cent of the amount of the tender. Bonds of the Dominion of Canada or bonds of the Canadian National Railway Company will also be accepted as security, or bonds and a cheque if required to make up an odd amount.

Note—Blue prints can be obtained at this Department by depositing an accepted cheque for the sum of \$10.00, payable to the order of the Minister of Public Works, which will be returned if the intending bidder submit a regular bid.

By order,
S. E. O'BRIEN, Secretary
Department of Public Works,
Ottawa, June 13, 1928.

Quarter-Century Mark Passed In Life Of Matsqui Lutheran Church

Matsqui Lutheran congregation celebrated the 25th anniversary of the church on Sunday last, the festival being attended by many adherents from Vancouver, Bellingham, Lawrence and Sumas, and a large local congregation.

Rev. O. Skilbred of Vancouver conducted the Norwegian service in the morning, while Rev. Johansen officiated at the altar. Mr. Worsoe of Vancouver sang a solo, and the Matsqui quartette, consisting of Messrs. Hurum, Igeland, Myhre and Westlin, rendered selections.

Service was conducted in English in the afternoon, addresses being made by Rev. C. Johansen, Rev. Gulhaugen, of New Westminster, Mrs. Christiansen of Astoria, Ore., and Rev. O. J. Ordal of Bellingham. An organ recital was given by Miss Stella Hurum and Miss Johanna Tollem of Lawrence sang a solo. Other solos were sung by Mr. Torkelsen of Red Wing Seminary, Minnesota, and duets were rendered by Rev. Gulhaugen and Mr. Olsen of the New Westminster quartette, and by Mr. Torkelsen and Mr. Pedersen of the Red Wing Seminary.

Interesting events in the history of the church were then read by Mr. J. Igeland, secretary of the church. Luncheon was later served in the Parlor by ladies of the Auxiliary.

Mrs. H. Hagen of New Westminster is a guest of her sister, Mrs. F. Hensen. Mrs. L. Henriksen of Port Alberni is visiting her daughter, Mrs. W. Malles

CLAYBURN

Mrs. Mutton and Master Billy Mutton of Los Angeles have returned to their home after spending the last six months with Mrs. Mutton's parents, Mr. and Mrs. J. Kerr.

Miss Louis Thompson is vacationing with her parents, Mr. and Mrs. Fred Thompson.

Mr. Donald Guiver of Seattle is the guest of her parents, Mr. and Mrs. Hilsley, of Kilgard.

Mrs. Davis has returned from Seattle where she has been for the past month.

The garden party that was to have been held at the Clayburn Manse on Thursday, has been postponed on account of the mosquitoes.

Clayburn school-closing exercises will be held on Friday, followed by a picnic and sports, to be held on the Benson place.

Mr. H. Peachey has purchased an Essex sedan.

WORLD HAPPENINGS BRIEFLY TOLD

Premier King, replying to a question in the House, said the Government had no intention of establishing legations at Buenos Aires and Mexico City.

Partial prohibition has been decreed in Tabasco, Mexico, by the State Government. An order was issued making it unlawful to sell any alcoholic drink except beer and cider.

There will be no Canadian cadets sent to the Junior Bisley rifle meet this year, it has been announced. Word has been received that a team would have to pay its own expenses.

Three delegates from Soviet Russia will attend the International Wheat Pool conference to be held in Regina on June 5 to 7 inclusive, according to word received by C. P. Burnell, chairman of the International Conference Committee.

Gerald T. Evans, of Vancouver, B.C., won the Sutherland gold medal in biochemistry, it was announced at McGill University, when the second year results in the Faculty of Medicine were posted.

A matter of fact statement in the official Turkish newspaper Milliet says that the Ankara Government has passed a law forbidding the importation and use of calculating machines in Turkey under severe penalties.

E. S. Hertley, cable engineer, has gone to Victoria, B.C., where he intends to reside in future. Mr. Hertley visited the Pacific coast in 1926 in connection with laying of the duplicate cable between this country and Australia.

Hon. Philippe Roy, Canadian Commissioner in Paris, may be Canada's first minister to France. This was indicated by the Prime Minister when the vote of \$75,000 for representation to Paris was discussed in the Commons.

The application of the Winnipeg Board of Trade for a revision of the regulations applying to attendants travelling with race horses has been rejected by the Board of Railway Commissioners. The application was to permit more than two attendants to travel free in cars with race horses.

Norse Celebration In Winnipeg

Expected To Be The Largest Gathering Of Norwegians Ever Held In Canada

The Norse Celebration at Winnipeg from July 5th to 10th, promises to be the largest gathering of Norwegians held in Canada. It will be an international gathering, for thousands of Norwegians are expected from the United States and representative men from Norway will be present. Many of the Canadian and United States Bydelags, or Norwegian Societies, and the League of Norsemen of Canada have arranged to hold their biennial meetings in Winnipeg during the week of the celebration.

Besides a good program of recreation, music and speeches, there will be Norse art exhibits, several of which are being brought from Norway. The feature item on the musical programs to be given will be the numbers by the 1,000-voice choir of the Norwegian Singers' Association of America.

There are about 73,000 persons of Norwegian birth and origin in Canada of whom 62,000 are in the provinces of Manitoba, Saskatchewan and Alberta.

Varied Farm Activities

Some unusual sights were to be witnessed in the farming territory of Southern Alberta recently. In the same district it was possible to see ploughing, discing, seeding, threshing and hauling grain to the elevator at one time.

Build Eighteen Elevators

Eighteen elevators are being constructed by the Alberta Wheat Pool. Each will have a capacity of 30,000 to 40,000 bushels.

An English paper suggests that it is not so hard to escape from a flapper, "but a widow knows all the de-tours."

Walk in Peace

Remove the hard skin from your corns, apply Minard's freely and get comforting relief.

Airmen In New Venture

Aviators Used To Check Spread Of Rust In Western Canada

Shooting microbes from an aeroplane is the latest venture among aviators in the Royal Canadian Air Force. It has some of the fascination of a fast game, in addition to being an important undertaking for Canadian agriculture.

For the past few years the Canadian Federal Department of Agriculture has been trying to combat wheat rust, which makes its appearance in the great wheat fields of Western Canada, by working from the ground. The Department has now enlisted the aid of the Royal Canadian Air Force. The airmen, including a technical expert in agricultural bacteriology, are provided with sensitized plates which are exposed to the air. The spores of wheat rust, floating at high altitudes, are caught on the plate and analyzed. The spores have been detected at a height of 5,000 feet, and the fliers have run into clouds of these invisible organisms which have registered as many as 5,000 to the centimeter. The spores float at an altitude and when there is a rainstorm they are precipitated and thus the rust appears in widely separated areas and without any visible means of contact. The use of sensitized plates and the airplane has revealed how rust has spread in the past, and provides a means of checking one of the menaces to the wheat crop of Western Canada and the Western States.

Use Of Electric Power Increasing

Canada Is Second In Per Capita Consumption Of Electricity

Norway, Canada and the United States lead the world in the per capita consumption of electricity says the Geological Survey of the United States. Figures given by that authority place Canada's consumption in 1927 at 1,320 kilowatt hours per capita, compared with 690 kilowatt hours in the United States. That for Norway is given as 2,400 kilowatt hours in 1925. Other statistics given in the statement afford comparisons with available data for Canada showing progress on the North American continent in 1927. The increase in output of public utility plants in the United States from 1926 to 1927, was about 9 per cent. The output of central electric stations in Canada according to official figures of the Dominion Bureau of Statistics in the same period gained 12½ per cent. The two statements also afford a comparison in the relation which water power bore to the total output. In the United States the amount produced by water was 37 per cent. In Canada, 98½ per cent. was produced by water power, only 1½ per cent. of the electricity of central electric stations being produced by fuel. — Bulletin by the Department of the Interior, through its Natural Resources Intelligence Service.

Cannot Locate Owner

Ireland Unable To Collect Taxes On Valuable Land

How to collect taxes from a land that nobody owns and yet is occupied is puzzling the May County Council of Ireland. In Letterbrick, North Mayo, are 2,291 acres, the owner of which cannot be found. Some time ago the Land Commission bought the estate of which those acres are part, but refused to use them as they consisted mostly of mountain land and could not be used for farming. The adjoining tenants have taken possession of the mountain and now graze it in common. The Land Commission is unable to interfere, and the Mayo County Council wants the users to pay taxes on the land, but cannot compel them to do so because they are not the legal rated occupiers.

Man may want but little here below, but he wants it just as quick as he can get it.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

Continued.

The Co-operative Wholesale Society embraces almost every conceivable form of modern industry and commerce. It manufactures everything that the modern household needs. It owns a fleet of ships, a printing establishment, wharves, warehouses, fishing stations, tea plantations in Ceylon and farms in the British Isles. It operates a bank, which has an annual turnover of several million dollars. Its Sun Flour Mill is the largest in Europe and works day and night. Here great quantities of Canadian wheat are regularly used. This was our next point of inspection. We were all equipped with long white coats and spent two hours seeing this tremendous mill.

Following our visit to the C.W.S., we were the guests of the Chamber of Commerce at a meeting arranged by representatives of the Fruit and Provisions Trades, who addressed us on the requirements of the Manchester market. We were thus again enabled to gather much useful information.

We now hurried back to our hotel and to get ready for one of the outstanding functions it was our privilege to enjoy during our trip—the reception by the Lord Mayor and Lady Mayoress of Manchester. Over 1,200 citizens of Manchester assembled in the Guildhall to meet us and the spectacle as all these people stood in the main body of the brilliantly lighted hall, while we were welcomed by the Lord Mayor, is one that will never be forgotten by those who attended.

On the morning of the 20th we were taken through Trafford Park, one of the greatest and most modern industrial sights of England. Here there were vast storage and handling facilities for products from every quarter of the globe that find their way to Manchester. Some Canadian products were on view, but competing products from Ireland, Denmark and other countries were much more in evidence. We saw the great safes where cotton is stored and after which the latest cotton storage safes of New Orleans have been modelled.

We were here privileged also to see one of the greatest industrial plants of England—the Metropolitan-Vickers Electrical Works—the magnitude of which could not be comprehended by one who has not seen it. Here is made everything electrical from the equipment of super-power stations to the smallest domestic appliances. In the main shops each of the great aisles is 900 feet long by 90 feet wide, the over-all width of each shop being 440 feet, and 80 feet from the floor to the ridge of the roof. Each of the two main aisles is spanned by three or four fifty-ton electric cranes, which can pick anything up from any part of the floor.

We were next taken for a trip down the great Manchester Canal, by which ocean-going steamers reach the very doors of the city, 35 miles inland. Accompanied by the Chairman of the Board and many other officials we were enabled to view the great shipping of the port and pass through lock after lock toward the sea. During this trip we saw a swing bridge over the Canal open to let our steamer pass and when it closed we saw, to our astonishment, that the swing bridge itself was part of a small canal on a higher level and a few seconds afterwards a number of barges passed over it.

The Manchester Ship Canal might be said to be one of the wonders of the world. Though a private company, it is owned by 40,000 shareholders, many of them laboring men. The rise of Manchester to its present position as a port, is almost entirely due to the completing of the Ship Canal. The long hard parliamentary fight for its construction developed in Manchester a co-operative spirit and civic pride which would be hard to duplicate in even a modern Western Canadian town.

After viewing the Ship Canal we were the guests of the company to a magnificent lunch in the Midland Hotel, to which were gathered the leading business men of Manchester.

Following this we paid a short visit to the Royal Exchange, the largest Exchange in the world, with a ground-floor space of one and three-quarter acres. Unlike trading exchanges in our country, seats are not owned, but members join on an annual fee basis. The Royal Exchange of Manchester represents chiefly the cotton industry and those allied to it. "High change" is on Fridays, when as many as 7,000 men may sometimes be seen gathered together buying and selling on the floor of this Exchange.

Our journey from Manchester to Wolverhampton provided a mild adventure, for by the time the coaches had reached Knutsford, a little town made famous by Mrs. Gaskell, in her story "Cranford," a fog blanket had fallen. We "hove to," wondering if we would be able to continue the remaining 60 miles, or if this fog would mean a night in the coaches by the side of the road, with every chance of being rammed from behind by other motorists. After an hour's wait, however, the fog lifted somewhat, and it was decided to push on as long as our drivers could see a yard ahead of them. The headlights were turned to the side of the road and with one man standing on the running board we made progress at about five miles an hour. During this long and tedious journey we sang songs and told stories whiling away the time after all quite pleasantly.

We reached Wolverhampton at 11.30 where, notwithstanding the late hour we found the Mayor (Councillor A. E. Wood), waiting for us and a steaming supper which was certainly welcome. In the circumstances, the Mayor cut out all formality, inviting us to join him after supper in the lounge where we were entertained. Here also we met Mr. E. W. Brown, of the London Office of the Canadian National Railways, who, besides his business qualifications, has a first class reputation as a Canadian singer, and kindly gave us of his best. We left Wolverhampton immediately after breakfast for the ham and bacon factory of Messrs. March & Baxter, at Brierly Hill, a small town a short distance out of Birmingham. This plant is one of the finest of its kind in the country and Messrs. March & Baxter are the largest bacon curing firm in Great Britain. The Company believe that to maintain quality in their products, the very finest raw material must be used and to this end conduct educational campaigns amongst the farmers who supply them.

(To Be Continued.)

Recipes For This Week

(By Betty Barclay)

LIGHT LUNCH CROQUETTES

Two cups left-over meat or fish may be mixed with 1 cup thick cream sauce for croquettes. Mold in desired shape, roll in dried bread crumbs, then in beaten egg, again in bread crumbs and fry in hot fat. Thick cream sauce calls for 1 cup milk, 1-3 cup flour, 3 tablespoons butter, ½ teaspoon salt and a touch of pepper.

RHUBARB PUNCH

1 quart rhubarb.
1 quart water.
1-3 cup orange juice.
4 tablespoons lemon juice.
1½ cups sugar syrup.
Few grains salt.
1 pint mineral water.
Cut rhubarb in small pieces, cook with water until fruit is soft. Strain through double thickness of cheese-cloth, add orange juice, lemon juice, sugar syrup and salt. When ready to serve pour over a cake of ice in a punch bowl, add mineral water and allow to get very cold. Makes 8 glasses; 24 punch glasses.

Big Aerial Camera

Machine Has Five Mile Range and Pictures Four Square Miles

An aerial camera with a range of more than five miles, designed to photograph areas as large as four square miles, has been built for the United States army air corps, the manufacturers announced.

It received its first tests at New York, and was sent to Wright Field at Dayton, O., where it will be installed in an army plane for extensive experimental photographic work.

The camera was made by the Fairchild Aerial Camera Corporation for use at altitudes at which photography never before has been attempted and beyond the range of anti-aircraft guns.

The per capita consumption in Canada of wheat ground for food for the years 1919-27 averaged 4.7 bushels.

There are times when the almighty dollar will not go as far as a little politeness.

Have Not Accepted Auto As Necessity

People In Europe Still Consider It A Luxury

Automobiles are still the exception rather than the rule on the continent of Europe, where the pedestrians outnumber those who ride by twenty, thirty and even a hundred to one.

Recently when the automobile advertisers got together to think up ways and means of inducing Europeans to buy cars and graduate out of the pedestrian class, one of the speakers summarized the attitude of different peoples toward the automobile as follows:

"At the present time an automobile in France is a privilege; in Germany an instrument of domination; in England an element for comfort; in Italy one more reason for loving modern life, while in the United States it is merely a current utility."

It will probably be a long while before automobiles become more or less common property in Europe. While in America three-fourths of the cars sell for less than \$1,000 only a few sell under four figures in Europe.

Costly Demonstrations

New York Spends Thousands Cleaning Streets After Honoring Famous Men

Measuring a public man's popularity in New York by the physical labor necessary in his honor, is now occupying the attention of metropolitan newspapermen. To move the city's recent tribute to the Bremen flyers it took 60 trucks, 100-motor-driven street flushers and 1,200 men working eight hours to rid the streets of 1,500 tons of telephone books, ticker tape, waste paper, etc., flung out of the skyscraper windows. And it cost the city \$16,000. Col. C. A. Lindbergh was rated at 1,700 tons of paper. On Armistice day, 3,000 tons went out of the windows; Commander Byrd got 700 tons and Gertrude Ederle 400 tons. Fame on paper is a curious thing in any event.

Nations Are All Interested

Many Airmen Preparing To Try Atlantic Trip This Summer

Almost every nation of Europe seems to have been bitten by the trans-Atlantic flying bug. Not only the larger nations like, Britain, France, Germany and Italy, but the smaller nations like Sweden and Holland as well are entering on the great aerial sweepstakes.

Nor are some of the airmen content with a single flight. A few, like Captain R. H. McIntosh, who attempted a flight last summer expect to fly over and back. McIntosh with a flying boat says he will make a double and triple crossing of both the North and South Atlantic.

The planes range from modest two-seaters like that of J. S. Charlton, of England, and his wife, Lady June Charlton, to the 135-passenger airplane planned by Professor E. Rumpler, of Germany. E. P. Young, an English pilot, is building a plane capable of carrying 20 passengers. He has adopted the unique experiment of advertising for passengers, saying he will fly July 1 from London to New York.

The dirigibles in course of construction are attracting possibly more attention than the heavier-than-air craft. The R-100, is rapidly nearing completion at Howden, Yorkshire, England. It will carry 100 passengers, a crew of 40, ten tons of mail, and make the journey from England to America in 48 hours. The flight will take place in the summer. In England moreover, a sister ship, the D-101, is proceeding more slowly. A semi-rigid airship, the BSB-1, about one-fifth the size of the R-100 is planned by the British Airships, Ltd., for a trans-Atlantic flight. In Germany, a Zeppelin is being built, competing in point of constructional speed with the R-100.

A Strange Luncheon Party

Twenty Guests Entertained Inside Great Organ At Royal Albert Hall

A luncheon party of twenty men inside an organ would seem impossible, yet this happened lately in the swell-box of the great organ at the Royal Albert Hall, London, beneath its 13,000 pipes and amid a storm of music.

The guests had come to be shown some of the intricacies of this wonderful instrument, which is soon to have added to it a solo organ with several thousand new pipes. It will then be the largest concert organ in the world.

At this strange luncheon party one of the hosts was Dr. Eaglefield Hull, the organist, who is shortly giving a series of recitals to test every resource of the huge organ.

Praise For Canada

Mrs. Stanley Baldwin Cannot Imagine Anything Nearer Paradise

"If England ever gets tired of us, the prime minister and I will probably go to live in Canada, that is if we are not too old, for we were so delighted with the Dominion on our recent visit."

This was the declaration of Mrs. Baldwin, wife of Great Britain's premier, Stanley Baldwin, when addressing the girls at a distribution of prizes at the City of London school.

Mrs. Baldwin urged the girls to go to Canada for, she said, "there is no better place for young married people; and providing girls choose the right kind of men, I cannot imagine anything nearer paradise."

New Assistant: What is in that red bottle?

Old Hand: That's the medicine we give customers when their prescriptions are illegible.

With nearly 2,500 convicts serving terms in Canadian prisons, less than 150 are Negro, Indian or Mongolian.

SHIP CHRISTIE'S BISCUITS BY AIR FREIGHT

When Major Fitzmaurice, the Irish member of the "Bremen's" crew arrived at Seven Islands from Greenley Island, he and "Duke" Schiller, pilot of the relief plane, were met by Mr. L. A. Genest, Lower Quebec representative of Christie, Brown & Co., Limited, and Mr. Stewart of the Clarke Trading Company, who tendered them refreshments in the shape of hot coffee and Christie's Biscuits which were, naturally, much appreciated. The above picture shows the aeroplane which carried the first shipment of Christie's Biscuits by Canadian air freight from Toronto to Windsor.

Particularly Smart

Novelty woollen is used a great deal in daytime models, and it is particularly smart in combination with canton faille crepe or plain woollen in harmonizing tone. Style No. 901 features soft shirring to mold the hip-line. Shirring is repeated at shoulders in front to provide fullness to bodice. The French V-front adds length to silhouette. Crepe satin, sheer crepe, flat silk crepe and wool crepe are fashionable. Pattern in sizes 26, 28, 30, 32, 34, 36, 38 and 40 inches bust measure. Size 36 requires 3½ yards of 40-inch material with ¾ yard of 36-inch contrasting. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

CHAPTER XXIV.—Continued.

"I cannot see anything very clearly," said Jack, miserably. "I only know my wife has gone. Circumstantial evidence seems to be against her, but nevertheless I will do my utmost to find her. I will take her word against the world."

The magistrate laughed softly, but there was no mirth in the sound. "Have a drink, my dear young friend," he said, "and forget her."

"No, thank you," said Jack. "I do not drink, and I am pretty sure I will never forget her."

There was something in the young man's voice and in his face that made Col. Blackwood wonder if he had pursued the right course. Perhaps he should tell of her coming to him to find out about the marriage. Perhaps he should tell . . . No! the heli-cat—she had been impertinent to him, and she had threatened him.

When Jack had gone the magistrate sat a long time, wondering. Then he went to the cupboard and poured himself a drink; another drink, Ah! that was better. Now he knew he was right; another drink, and he was sure that he had done not only a wise but a noble thing in leaving the marriage unrecorded. After the third drink, he sat in a mellow haze, musing pleasantly on the time that young Jack Doran would come to him with tears standing in his eyes and thank him for what he had done. "You saved me, and though I should live a thousand years I shall never be able to thank you adequately, Sir." And he would reply—"Have done, my boy—have done; one brave man must ever help another!"

So the night wore pleasantly on.

CHAPTER XXV.

Not so pleasantly did the night pass with Jack Doran, who sat in the station waiting for No. 8 and listening to the wires telling their never-ending story—a dull, gray station, dusty even when the snow had covered all the dust. A red stove in the middle of the floor, egg-shaped, fluted, and either fireless or red hot according to the mood of the agent; torn posters showing palatial white steamers ploughing green seas and carrying pleasure-seeking Canadians to tropical lands, all for trilling sums "and return;" a bill of sale, where instructions had been given to the auctioneer to spare nothing, ill-health the cause of the owner's desire to sell; a stray notice re a bull pup answering to the name of "Buster," with a reward; a dance and raffle at Bannerman by St. Faith's Ladies' Aid, program and refreshments, and cordial invitation to all; "Save the Forest!" poster—"The forest is ours, let us keep it always;" John Fernwald's announcement of his ability to mend

ATTENTION, WOMEN OF MIDDLE AGE!

Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Byemore, Alberta.—"The Change of Life was the trouble with me and I was run-down, thin, and weak and could not sleep, had a poor appetite and could not do much work. I am taking Lydia E. Pinkham's Vegetable Compound now and I feel like a well woman. I saw it advertised in the papers and tried it and Lydia E. Pinkham's Sanative Wash. I have recommended it to a lot of women friends." Mrs. Wm. Goodkey, Byemore, Alberta.

W. N. U. 1736

shoes, Old Country methods and moderate prices—try me once.

Jack came back to his own bitter thoughts, to which the telegraph wires made a weird accompaniment, ghostly and grim. He could see the instrument from where he sat, muttering, tapping, clicking with its mysterious finger, silent for a few moments, then convulsed and shaken with the desire to be understood. He thought of all the suppressed emotions, the heart-break, anxiety and fears the wires carried in dead silence along the miles, and how they break into strange tappings here, chokingly alive and articulate.

Life was like that, he mused, we all carry our load of emotions carefully hidden, but we cannot all throw it off at intervals in dots and dashes like the wires.

Reaching the city, Jack went to the Macdonald Hotel, where he met his partner, Keith, whom he had not seen since the night of the recruiting meeting at Peace River. They discussed their plans for the future.

"I am going to have our specimens assayed here at the University, and I will go at once to Victoria to file our claims," said Keith.

Jack told him briefly of his domestic trouble. "I believe she is here in the city," he said in conclusion, "and I want to find her. I will not believe a word unless I hear it from her."

Keith whistled softly. "This is bad work, boy," he said, "and I sure am sorry. Women are the finest in the world or the worst—if they're not one they are the other. When you begin to break off the coupons from your gold mines stock you'll have a flock of them pursuing you, anyway."

Jack was looking out at the wide view of the winter landscape, with the magnificent river, covered with snow, winding away into the blue distance. "I don't want a flock," he said, "but I do want Helmi. If you knew her, Keith, you would know she couldn't be crooked. She has eyes that are like a little girl's, full of wonder and innocence."

"I don't believe there are any innocent girls these days," Keith replied, lighting his pipe for the twentieth time. He could never keep his pipe going, and when he sat for half an hour in one place he had burnt matches strewn around him like confetti around a bride. Keith was a low-set man of very dark complexion, tanned now to a rich mahogany.

"My own opinion is that you are well out of it, Jack," he continued; "but I'll admit I'm no judge of women. They can all fool me."

"Sometimes I think of enlisting," said Jack. "When I listened to that boy leaning on his crutch I wanted to go. The other old soak rather spoiled it, though."

"Gosh! I liked him," said Keith, grinning. "He told us some of the richest stories I ever heard."

"I couldn't stand him and his stories," Jack said with warmth, "he's the sort that make war, he loves it, you can see that—but you'll notice he will never do any of the fighting. It looks as if the thing had to be finished up now that we are in it."

Keith was watching Jack closely even though he was so busy keeping his pipe going. "I'll certainly look after your interests, Jack, if you want to go. I'll file for you on everything I get while you're gone, and I'm going to get right after the potassium deposits and the oil as soon as I get the gold cinched."

"I knew you would," said Jack gratefully; "I am not thinking about that."

"And I'll do my best to locate the Helmi girl and see that she has plenty."

Jack remembered Helmi's outbreak of rage when Keith's name was mentioned, and hastened to say, "I hope I'll find her before I go."

So, gradually, the thought of enlisting took shape in Jack's mind. It was with him when he stepped into the white bath-tub and enjoyed the luxury it afforded, with its shining appointments, snowy towels, foaming soap. But he couldn't forget what Private Crowe had told about the dirt, the mud, the lice, the scratchy underwear. He was glad to think of the wealth coming to him from the gold mine, for he craved all the luxuries of life, and he wanted to be able to give them to other people. He loved white sheets, smooth and satiny, and beautiful rugs with deep rich colorings, music, pictures; but especially did he want these things for Helmi, who had such a love for beauty.

No matter where Jack's thoughts began they would soon come back to Helmi. He wondered if she had got the two hundred dollars all right. At first he had thought that he would send for it when they were outfitting at Peace River, but Keith sold another share, and then they were all right. He had even written out an order for a friend of Keith's who offered to advance the money and get it when he went to Eagle Mines. What had he done with that order? Yes, he remembered—Keith got it

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum.

back from his friend and destroyed it.

The first day Jack was in the city he made a thorough search of all the Chinese places, but without result. When he came to Sam's he was met by the wily proprietor, who had learned in a hard school that it is foolish to give information. Sam could lay down all his knowledge of English in a fraction of a second. "I not know," all at once became his entire English vocabulary.

(To Be Continued.)

NEGLECTED ANAEMIA

Often Leads To the Most Serious Consequences

In no disorder is delay or neglect more dangerous than in anaemia. Usually the first noticeable signs are pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, palpitation and breathlessness. The only way that anaemia can be overcome is to enrich the blood, and it is because of their wonderful blood-enriching and blood-making properties that Dr. Williams' Pink Pills have won such great success in the treatment of this often most stubborn disease.

Thousands of young girls who were in an anaemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Katie McEachern, Port Hood, N.S., says:—"I praise the day I began the use of Dr. Williams' Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells, and occasional fainting spells. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I continued their use until I had taken six boxes, by which time I was again enjoying good health. I hope my experience will lead other sufferers to give this medicine a fair trial."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Cardinal Newman On Style

To Produce Good Literature Put Your Thoughts Into the Simplest and Clearest Words Possible

"I have no style," wrote Cardinal Newman. "All my life I have tried to think out clearly what I know, what I see, what I feel, and to put it into the simplest and clearest words. That is all my style. To produce literature you must first of all know what you are writing about; write in as simple words as you can; cut out the purple patches; be sincere without being dull; grip the subject before you; feel it, and translate it into the simple English our fathers have handed down to us."

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

Bank Carries Largest Sign

The largest outdoor advertising sign in Detroit has been made by painting the windows of the First National Bank Building to form the numeral "1st". The numeral is fifteen stories high, extending from the eleventh storey of the big building. The letters "ST" extend eight storeys.

For Rheumatism use Minard's Liniment.

Most of the bats of Canada eat only insects, but there are a few fruit-eating bats in the extreme south of the United States and many in Mexico and Central America.

The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Ambrose Orser, Elginburg, Ont., writes:—"I suffered for some time with a bad heart which seemed to be controlled by my nerves. The least little excitement would cause it to flutter and palpitate, and at times I would have real bad spells. I suffered in this way for some time when, one day, I saw

advertised, so decided to try them. I had only taken a few boxes when I noticed that I felt better, so I continued taking them and in a short time my heart felt entirely different."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

DENTAL HEALTH PILLARS

"Sugar and spice and everything nice" may be what little girls are made of, but certainly such a diet would never build strong, healthy little girls and boys.

With the child properly started on the road to health, through the mother's careful dietary habits, there must be no slacking in this regard, if it is to continue safely along the way.

Proper diet from the nursing period up through adolescence has much to do with teeth and health. It is now that nutrition plays the chief role in the formation of healthy tooth tissues or in their early degeneration and decay. But hand in hand with this must go the maintenance of cleanliness through training the child in the best and most thorough mouth hygiene.

The notion that the deciduous teeth being replaced by successors can therefore be allowed to go without the care necessary to keep them sound and comfortable is most mischievous. Too early loss of these little teeth from any cause, leads to disturbances of the permanent dentition with consequent general disorders.

It would be better for the young child not to know the taste of sweets too soon, thereby avoiding their craving at this early age when they may be harmful both to the tooth and the body health. Plain wholesome foods should be the rule including plenty of milk which, because it is both rich in nutrient qualities and easily assimilated, is the perfect food for the young child.

Parents should be reminded too, that the child should be brought to the dentist at about three years of age and thereafter at stated intervals. Preferably the first visit should be made before there are any cavities in order to establish the confidence of the young child in these services. Much of the dread of dental treatment, with its consequent neglect of mouth conditions among adults has arisen through recollections of a painful first visit during the tender years.

It may be further noted that the susceptibility to tooth decay is greatest in youth, most cavities appearing before the twenty-fifth year; and that the period of adolescence and between the twelfth and sixteenth years marks the high-water mark of dental decay—due to the rapid physical changes demanding an increased calcium supply present in the diet.

Diet, mouth hygiene and systematic dental examinations are the three pillars of dental health.

Ocean Ships For the Great Lakes

Tramp Steamers From Europe Pushing Their Way Into the Great Lakes

One indication that if the St. Lawrence canals were deepened, sea-going freighters would come up to the ports on the great lakes is that this is already done by tramp steamers which are able to go through the shallow St. Lawrence canals. A German freighter from Hamburg is now lying at the docks of Detroit taking on a cargo of motor-cars which it will unload at Barcelona, Spain. For years past an occasional small tramp steamer has pushed its way into the great lakes in search of a grain cargo. If these things happen with 14-foot canals it is a safe prediction that a 27-foot channel would bring whole fleets of tramps to the lake ports. The tramp steamer will go where there is traffic if it is possible to get there.—Manitoba Free Press.

Attacked By Asthma. The first fearful sensation is of suffocation which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Canada's New Status

Now Receiving General Recognition In International Procedure

The peculiar status of the British commonwealth has received international recognition says the London Sunday Observer, in commenting upon the action of Secretary of State Frank B. Kellogg, in sending an invitation to the British Dominions and to India to join the British government in participating in his convention to outlaw war.

The Observer expresses the opinion that it would be easy for the United States to make difficulties over extending to the Dominions an invitation which was originally limited to the great powers, but it declared that Britain's clear and inevitable statement that she could not act alone, has been accepted and the invitation transmitted directly to the Dominions.

British scientist says that the brain is the only part of the body which doesn't wear out. The test of this theory, is, of course, first to find the brain.

A Girl Trapper

Follows a Trap Line Near Her Father's Homestead

Miss Jean Cameron, who came to her parents from England at the age of four, at ten commenced trapping in the district of her father's homestead. Today, at the age of 21, she finds it quite a lucrative and congenial pursuit and quite superior to any occupation which would keep her in the city. She follows a trap line within a ten mile radius of her house and her catch includes coyote, lynx, weasel, and fox.

Always Ready and Reliable. — Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Over Fifty Minerals Being Produced

A notable feature of the program of the Dominion as a mining country is the diversity of lines along which Canadian mining has advanced. Some fifty different minerals, metallic and non-metallic, are listed in the production figures for 1926, and this number includes a variety such as nickel, cobalt, asbestos, gold, lead, silver, copper, and zinc, in which Canada either leads world production or ranks among the greater producing nations.

A Swedish count is coming to Canada to learn farming by working as an agricultural laborer, and the question is, what farmer is going to take the count?

It is better to be lonely than to be bored.

Little Helps For This Week

"The will of the Lord be done."—Acts xxi. 14.

Light! more light to see
What is the true and perfect will of God.
That we may help to do it; not as tools,
That know not what they fashion,
but as hands,
Whose heart is in their work; and whatsoever
It be,—this, above all, more faith to cry
In darkness or in light, "Thy will be done."

Love is higher than duty, and the reason is that love in reality contains duty in itself. Love is duty and something more. "Love is a beautiful plant with a beautiful flower, of which duty is the stalk." All acceptable obedience flows from love; all true love produces cheerful service. We do not really love God if we do not seek to obey Him.—Rose Porter

Troops who had been exposed to gas attacks in the army showed less susceptibility to flu.

HERCULES

PERMANENT BUILDING PAPER

EASY TO USE

Hercules Permanent Building Paper is tough. It will not tear or crack with rough handling. Builders save time and avoid inconvenience with it.

EASY TO SPECIFY

Hercules comes in three grades—x, xx, xxx—for various purposes. Specify "Hercules" and the grade required.

EASY TO SELL

When a home is Hercules protected, selling is easy. There is always a ready market for a dry and warm home. Hercules is tested and proven wind proof and damp proof.

Examine Hercules. We will gladly furnish samples. May we?

The Law Now Demands That You Carry a "Brake-Inspection" Card

Most motorists are now aware that
they must carry a card showing that
their brakes were inspected by a re-
putable garage within the preceding
six months period, this law having been
in effect since May 25th.

Inability to produce this card leaves
the driver liable to prosecution.

The law requires that a car must be
so equipped with brakes that it can be
brought to a dead stop within the pre-
scribed legal distances, according to
speed of travel.

You are invited to bring your car to
Brett's, when it will be tested thorough-
ly for this requirement.

his home with a slight sickness.

Mrs. Kelly is visiting at Boundary
Bay.

Mr. H. L. Atkins returned last week
from a business trip to California.

E. Thompson is assisting at the B.C.
E.R. depot during the vacation of W.
Wall.

Abbottsford public school closes this
week, ending a comparatively success-
ful term. No changes in the teaching
staff are anticipated at this time.
Mrs. Blackie and Miss Benedict have
resigned from their posts as teachers
at the high school.

As one of B. C. Institute of Journal-
ists party conducted over the limits
of the International Timber Co. at
Campbell River this week, G. H. Heller
was shown the result of reforestation
methods adopted by the logging con-
cern. Instead of burning off the areas
after they are logged, as is often done,
natural seeding is allowed to proceed,
with the result that the sections shown
the party of newspaper men exhibit a
remarkably fine second-growth, about
60 per cent. of which is fir. These young
trees range from three to eight feet in
height, and are densely planted. The
area on which they stand was logged
five years ago.

A cozy tea room has been provided,
in the Jubilee Parlor by E. A. Hunt,
part of the store having been decorated
and tastily furnished.

Mrs. J. C. Jensen of Sumas, Wash.
underwent an appendix operation in
the M.S.A. hospital last Thursday.

Haddrell and Hester Heller, pianoforte
pupils of the Misses Nelson, passed
their London Royal Academy of Music
examinations last week, conducted by
the travelling inspector.

Matsqui Co-Operative Names Directors

Five directors were elected to manage
the Matsqui local of Fraser Valley Co-
operative Growers' Association, at a
well attended meeting held in Matsqui
hall last Thursday, these being John
Mutch, R. Benny, J. Westlin, A. E. Farr
and L. Beharrell. G. H. Myhre was
appointed secretary, pro. tem.

Geo. P. Challenger, president of the
co-operative, addressed the meeting,
pointing out, among other things, that
although the co-operative had func-
tioned but a short time, already one
year's operating cost of the entire or-
ganization had been saved by the in-
creased prices obtained for early po-
tatoes—this without exacting higher
prices from the consumer.

The Matsqui local has about 80 mem-
bers, and will handle principally hay,
oats, straw and potatoes.

Committee Sets New Scale Licence Fee to Benefit Small Grower

Evidence of the value of the work of
the committee of direction in the
marketing of potatoes is shown this
week when a comparison is made with
the existing prices and those of a year
ago. At this time last year the pro-
ducers were being paid \$28 a ton and
the tubers were being retailed at three
pounds for a quarter. Today the
farmers are receiving \$80 a ton and the
potatoes are still retailing at three
pounds for a quarter.

Recently the committee set a new
scale of licence fees for the benefit of
the small grower. Up to ten sacks, no
charge will be made. When the crop
is five tons, the fee will be \$1 and for
40 tons, the fee will be \$5. The max-
imum licence fee will be \$20.

No potatoes grown in the area con-
trolled by the market committee are to
be marketed without the written per-
mission of the Mainland Potato Com-
mittee of Direction. When such per-
mission is given, all such potatoes for
marketing must be delivered to and
despatched from one of four places,
unless special permission is granted by
the committee. The four points de-
signated by the committee are the city

en's wharf, foot of Telegraph street,
Victoria.

Prevention of the grower from being
victimized by the buying houses, is the
main objective of the committee of
direction, according to George Chal-
lenger, chairman, in announcing the
new scale of licence fees.

The committee is endeavoring to keep
the money in the province and in cir-
culation.

Some of the growers who have visited
the committee headquarters, located
in the city hall, have complained of
a certain amount of red tape connected
with the filling out of forms and the
instructions as to where they shall ship
their potatoes. In answer to this Mr.
Challenger points out that the work of

controlling the potato crop is just in its
infancy and that the benefits that
have accrued to the fruit growers in
the interior will in turn be obtained by
the potato growers.

In competition with 124 other con-
testants Dr. Wood carried away first
prize at the Agassiz F.V.M.P.A. picnic
last week, guessing the weights of an-
imals. Among others, he gauged the
poundage of a 1135-lb. yearling colt at
1132-lbs., and another animal which
tipped the beam at 1629-lbs. was es-
timated at 1622-lbs. by the local ve-
terinarian.

Pioneer of Great Shipping Line

The Brig Jean

The brig JEAN was the pioneer vessel of the Allan Line fleet,
which later became incorporated in the Canadian Pacific. In 1819
—the year the Allan Line was formed— a Glasgow newspaper
contained a "Notice to shippers and passengers to Canada,
that the brig JEAN, Alexander Allan, Master, will clear from Greenock
for Quebec on the 1st June and proceed to sea at the first favourable
opportunity thereafter." The actual entry of her sailing was contained
in the issue of June 11th: "Sailed June 6th, JEAN, Allan master, for
Quebec." She was then a brand new boat of 169 tons, having been
launched at Irvine in the Spring, with dimensions 76ft 8ins long,
a beam of 22ft 6ins., and 13ft 4ins. depth of hold. She had the
square stern used with vessels of her type at that date and was carved
built. Although the advertisements and all the history books describe
her as a brig, students of naval architecture will recognize her rigging
as that of a brigantine—a very handy and economical rig.

An illustration of the change in the size of shipping in a hundred
years is offered by the interesting fact that the DUCHESS OF BED-
FORD, new Canadian Pacific cabin steamship, could carry the JEAN
crosswise and only ten inches of the pioneer's bow and stern would
project.
